Asylum Levels and Trends in Industrialized Countries

Statistical overview of
asylum applications lodged in
Europe and selected
non-European countries

UNHCR
The UN Refugee Agency

Trends at a Glance

First half 2011 in review

↗17%

An estimated **198,300 asylum applications** were recorded during the first six months of 2011 in the 44 countries included in this report. This is 17 per cent more than during the same period 2010 (169,300), and is nearly identical to the number of applications recorded during the second half of 2010 (197,600).

420,000

If the observed historical pattern of asylum applications continues, it is estimated that the number of asylum claims that will be submitted in the **44 industrialized countries** for the whole of 2011 may reach 420,000. This would be the highest number in eight years, but still well below the peak of 2001 when almost 620,000 asylum claims were reported.

The **38 countries in Europe** received **144,000** claims during the first six months of 2011. This is an increase of 16 per cent compared to the corresponding period in 2010 (124,200 claims), but slightly less than the second semester of 2010 (149,400 claims). Europe accounted for three quarters (73%) of all claims lodged among the industrialized countries.

↘11%

↘27%

The **Nordic region** was the only European region to experience a fall in asylum applications in the first six months of 2011 (20,400 claims), compared to both the first and second semesters of 2010 (-11% and -27% respectively).

↗13%

The **27 Member States of the European Union** registered 123,400 asylum claims in the first half of 2011, 13 per cent more than in the first six months of 2010 (109,500). The EU-27 together accounted for 86 per cent of all asylum claims in Europe.

↗57%

While a relatively modest number of persons fleeing North Africa came to Europe, the highest relative increase was recorded for **Tunisian** and **Libyan** citizens. As such, in Europe, the largest relative increase was registered in **southern Europe** which received **25,100** asylum requests during the first semester of 2011: a 57 per cent increase compared to the first six months of 2010 (16,000 claims). The increase is mainly in the number of asylum-seekers in **Italy, Malta and Turkey**.

6,300

5,100

The number of asylum-seekers in **Australia** and **New Zealand** decreased by one fifth during the first half of 2011 (5,100 claims) compared to the first semester of 2010 (6,300 claims).

×2

In **Japan** and the **Republic of Korea**, almost **1,300** persons requested refugee status during the first half of 2011, more than double the figure for the same period in 2010 (600 claims).

In **North America**, an estimated **47,900** new asylum applications were submitted during the first six months of 2011: 9,600 claims or 25 per cent more than in the first semester of 2010.

With an estimated **36,400** asylum applications, the **United States of America** was the largest single recipient of new asylum claims among the group of industrialized countries during the first half of 2011. France was second with 26,100 asylum applications, followed by Germany (20,100), Sweden (12,600), and the United Kingdom (12,200). The top five receiving countries together accounted for more than half (54%) of all asylum claims received in the countries included in this report.

Who is an asylum-seeker?

An **asylum-seeker** is an individual who has sought international protection and whose claim for refugee status has not been determined yet.

As part of its obligation to protect refugees on its territory, the country of asylum is normally responsible for determining whether an asylum-seeker is a refugee or not. This responsibility is often incorporated in national legislation of the country and, for State Parties, is derived from the 1951 Convention Relating to the Status of Refugees. ●

Top 5

1. AFGHANISTAN
2. CHINA
3. SERBIA (and Kosovo: SC Res. 1244)
4. IRAQ
5. ISLAMIC REP. OF IRAN

With 15,300 asylum claims lodged by Afghans in the first half of 2011, Afghanistan was the most significant **source country** of asylum-seekers of all of the 44 countries included in this report, followed by China (11,700 claims), Serbia (and Kosovo: SC Res. 1244)¹ (10,300), Iraq (10,100), and the Islamic Republic of Iran (7,600). Persons from these five countries together accounted for 55,000 applications, or almost one third (29%) of all asylum claims submitted in industrialized countries

Australia and **Belgium** have revised the way in which they report asylum data to UNHCR. As a result, historical data for Australia has been adjusted for the period from 2002 to 2010.

I Introduction

*This report summarizes patterns and trends in the number of individual asylum claims submitted in Europe and selected non-European countries during the first six months of 2011. The data in this report are based on information available as of **14 September 2011**, unless otherwise indicated. It covers the 38 European and six non-European States that currently provide monthly asylum statistics to UNHCR. Figures are mostly based on official asylum statistics, reflecting national laws and procedures.*

THE GROUP OF COUNTRIES ANALYSED in this report is collectively referred to as “the 44 industrialized countries” and has been defined for the purpose of this report only. The 44 countries are: 27 Member States of the European Union,⁽²⁾ Albania, Bosnia and Herzegovina, Croatia, Iceland, Liechtenstein, Montenegro, Norway, Serbia,⁽³⁾ Switzerland, The former Yugoslav Republic of Macedonia, and Turkey, as well as Australia, Canada, Japan, New Zealand, the Republic of Korea and the United States of America. The group of 44 countries received an estimated 198,300 asylum applications in the first half of 2011.

The numbers in this report reflect claims made for first instance asylum procedures only. The report does not include data on applications on appeal or review, and it does not provide information on the outcome of asylum procedures or on the admission of refugees through resettlement programmes. This information is available in other UNHCR reports.⁽⁴⁾

To the extent possible, the statistics presented in this document reflect the number of individuals lodging an

asylum application for the first time. However, this may not reflect the actual number of new asylum-seekers, as some of the figures quoted may include repeat applications, including applications made by persons in more than one country during the same year.⁽⁵⁾

All data refer to the number of individuals, with the exception of asylum-seekers in the United States of America where only the number of cases (which may include several individuals) is available for applications submitted to the United States Department of Homeland Security (DHS). Applications submitted to the United States Department of Justice, Executive Office of Immigration Review (EOIR) are, however, recorded as individuals. To allow comparability with other countries of asylum, UNHCR uses a figure of 14 individuals per case to estimate the number of people reported by DHS because historical data suggest that, on average, one asylum case contains 14 individuals. In the country of origin tables, figures for the United States of America are a combination of the number of cases (DHS) and the number of individuals (EOIR), owing to the large variation in case size by nationality.

Revised data for Australia and Belgium

Data on asylum applications lodged in Australia and Belgium have been revised and are not comparable with previous UNHCR reports. In the case of Australia, statistics on asylum applications provided by the Department of Immigration and Citizenship were limited to individuals lodging a protection visa (PV). The new dataset includes both refugee status determination requests lodged by “irregular maritime arrivals” and protection visa requests. As a result, UNHCR’s monthly asylum statistics for Australia were revised for the period 2002 to 2010.

In the case of Belgium, UNHCR’s data on monthly asylum applications lodged during 2010 and later now include children accompanying the principal applicant, but exclude repeat claims for both the principal applicant and accompanying children. ●

All figures in this report should be considered as provisional and subject to change. Due to retroactive changes and adjustments, some of the data included in this publication may differ slightly from that reported in previous UNHCR documents, or from the official figures published by States. ■

² See Annex Table 1 for a list of countries.

³ The presentation of monthly asylum statistics of applications in Serbia does not include applications lodged in Kosovo (SC Res. 1244) owing to lack of monthly data for Kosovo.

⁴ See UNHCR’s 2010 Global Trends report at www.unhcr.org/statistics (issued June 2011).

⁵ According to EURODAC’s Central Unit, the verification of asylum claims in 2010 showed that 24.1 per cent of all asylum claims registered in the system were multiple claims, i.e. the applicant had submitted at least one previous application in the same or another Member State of the European Union (Source: <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=COM:2011:0549:FIN:EN:PDF>)

II

Overview of regional trends

*In the first half of 2011 there was a significant increase in the number of individuals requesting refugee status in the **44 industrialized** countries included in this report as compared to the first half of 2010. The total of 198,300 applications recorded during the first six months of 2011 is 17 per cent more than for the same period in 2010 (169,300), and is almost identical to the figures recorded during the preceding six months of July to December 2010 (197,600).*

UNHCR'S ANALYSIS of monthly asylum data for the past 10 years has revealed that, in a given year, the number of asylum applications submitted during the first semester has been systematically lower than the number submitted during the second semester.⁶ This pattern was observed at the regional and at the individual country level, as seen in **Figure 1 below**. Based on this observed trend, the number of asylum claims to be submitted in 2011 in the countries covered by this report could reach 420,000 by the end of the year. This would be the highest number in eight years, although still well below the 2001 peak when nearly 620,000 asylum claims were lodged.

The 38 **European** countries⁷ included in this report recorded 144,000 asylum applications during the first six months of 2011: 16 per cent more than during the corresponding period of 2010 (124,200) but 4 per cent less than during the second semester of 2010 (149,400 claims). Europe accounted for three quarters (73%) of all claims lodged in the 44 industrialized countries in the first half of 2011.

The trend is similar for the 27 countries of the **European Union (EU)** which registered a 13 per cent increase in asylum applications during the first half of 2011 (123,400) as compared to January to June 2010 (109,500). However, the figures showed variation in asylum trends at the regional and country level. The

15 'old' EU Member States registered 116,600 asylum claims (+14%) during the first semester of 2011 compared to the corresponding period of 2010 (102,200). In contrast, the 12 'new' EU Member States registered 500 fewer claims, a drop of 7 per cent.

Among the European regions, the largest relative increase in mid-year asylum levels was reported by countries in **Southern Europe**⁸ which received 25,100 asylum requests during the first half of 2011: a 57 per cent increase compared to the first six months of 2010 (16,000 claims). This increase was essentially in the number of individuals who requested international protection in Italy, Malta and Turkey.

⁶ The only exception to this pattern was in 2004 when more applications were lodged during the first half of the year than in the second.

⁷ See notes in Annex Table 1 for a list of countries included under this regional grouping.

⁸ Refers to Albania, Cyprus, Greece, Italy, Malta, Portugal, Spain, and Turkey.

TABLE 1 Asylum claims lodged in selected regions by semester

Regions	1 st 2010	2 nd 2010	1 st 2011	Change (%)	
				1 st 2010-1 st 2011	2 nd 2010-1 st 2011
Europe	124,200	149,400	144,000	15.9%	-3.6%
- EU-total	109,500	130,100	123,400	12.7%	-5.1%
- EU-old	102,200	121,800	116,600	14.1%	-4.3%
- EU-new	7,300	8,300	6,800	-6.8%	-18.1%
USA/Canada	38,200	40,500	47,900	25.4%	18.3%
Japan/ Rep. of Korea	600	1,000	1,300	116.7%	30.0%
Australia/ New Zealand	6,300	6,700	5,100	-19.0%	-23.9%
Total	169,300	197,600	198,300	17.1%	0.4%

See notes in Annex Table 1 for list of countries included.

Western Europe⁹ also showed an increase in new asylum claims, with close to 130,000 persons having applied for refugee status between January and June 2011. This is 16,600 more than during the first half of 2010 (113,200). Additional claims in France and Germany accounted for most of the increase. The drop in numbers observed, compared to the second half of 2010 (134,500 claims), was in line with the decrease observed for Europe as a whole (-4%).

The Nordic region¹⁰ was the only European region to experience a fall in asylum applications in the first six months of 2011, compared to both the first and second semesters of 2010 (-11% and -27% respectively). This decrease was evident in all major receiving countries in the Nordic region, except for Norway, where the number of asylum claims increased by 4 per cent during the first six months of the year compared to the first half of 2010. Overall, countries in the Nordic region registered 20,400 asylum applications during the first semester of 2011.

The number of asylum claims submitted in North America during the first six months of 2011 (47,900) increased by one quarter compared to the corresponding period of the year before.

In Canada there were 4 per cent more asylum claims in the first half of the year compared to the first half of 2010, while the increase in the United States of America was 34 per cent.

The number of asylum-seekers in Australia and New Zealand went down by one fifth during the first half of 2011 (5,100 claims) compared to the first semester of 2010 (6,300). The decrease of 19 per cent for Australia was the first drop in numbers in six years. Figures in Australia remained below those recorded by many other industrialized and non-industrialized countries. In New Zealand, levels continue to be fairly low and stable (170 claims during the first half of 2011).

In Japan and the Republic of Korea, close to 1,300 individuals requested refugee status during the first half of 2011, more than double the figure for the same period in 2010 (600 claims). Figures for Japan indicate that the number of claims lodged during the first half of 2011 (870) is the second highest level for a semester since data has been available.¹¹ In the Republic of Korea, some 390 individuals requested international protection during the first half of 2011 compared to 120 claims lodged during the first half of 2010. ■

⁹ Refers to Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and United Kingdom.

¹⁰ Refers to Denmark, Finland, Iceland, Norway, and Sweden.

¹¹ Monthly asylum data for Japan is available from 2002. Data for Japan are UNHCR estimates.

III

Countries of asylum

The United States of America continued to be the largest single recipient of new asylum claims during the first six months of 2011, accounting for one out of five claims lodged in the 44 countries included in Annex Table 1. An estimated 36,400¹² individuals submitted an application: 9,300 claims more than during the first half of 2010. Chinese and Mexican asylum-seekers primarily accounted for this increase, a phenomenon which has been observed for some time now. Roughly one quarter of all claims in the country were lodged by asylum-seekers from China while the number of Mexicans was at its highest in almost a decade.

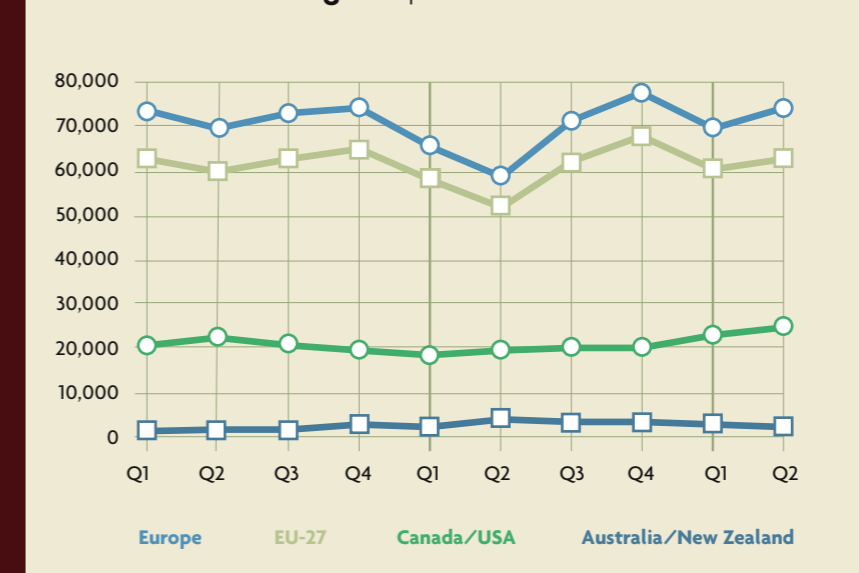

FRANCE RANKED SECOND among the 44 industrialized countries, with 26,100 asylum applications registered during the first half of 2011. This figure constituted an increase of 11 per cent compared to the corresponding period of 2010 (23,600), and an 8 per cent increase compared to the second half of 2010 (24,200). This increase was partly attributable to a near doubling of asylum claims from Armenia: from 970 in the first half of 2010 to close to 1,700 claims a year later. Asylum claims from citizens of Côte d'Ivoire more than tripled, from less than 300 to 1,000 during the same period. Serbia (and Kosovo: SC

Res. 1244) remained the top country of origin of asylum-seekers in France with 2,300 asylum claims registered in the first semester of 2011. Four out of five applications from people originating from Serbia (and Kosovo: SC Res. 1244) were lodged by Kosovars. On average every eighth application in the industrialized world was received by France. Together, the United States of America (18%) and France (13%) received about one third of all applications in the 44 industrialized countries covered by this report.

Germany was the third largest recipient of applications among the 44 countries, with 20,100 new asylum requests registered during the first six months

¹² Estimated number of individuals based on the number of new cases (17,700) and multiplied by 1.4 to reflect the average number of individuals per case (Source: US Department of Homeland Security); and the number of new "defensive" asylum requests lodged with the Executive Office of Immigration Review (15,600 - reported by individuals).

“The top five receiving countries accounted for more than half (54%) of all asylum claims.”

of 2011. This is a 29 per cent increase compared to the first half of 2010 (15,700 claims), but 22 per cent lower than during the second half of 2010 (25,700). One quarter of all applications from people originating from Serbia (and Kosovo: SC Res. 1244) in Germany were lodged by Kosovars. The drop compared to the second part of 2010 was largely in a decrease in asylum claims lodged by citizens of Serbia (and Kosovo: SC Res. 1244) and The former Yugoslav Republic of Macedonia. For both countries, the number of applications increased during the second half of 2010, in comparison with the first semester, possibly as a result of the waiver of European Union visa requirements for citizens of these countries. This trend appears to have been reversed during the first half of 2011. Afghanistan became the top country of origin of asylum-seekers in Germany during the first half of 2011, with 3,800 claims lodged by Afghan citizens. This figure was the highest level recorded for one semester for Afghan asylum-seekers in Germany in more than a decade.

Sweden ranked fourth among the 44 industrialized countries with

12,600 new applications received during the first six months of 2011. This corresponded to a 10 and a 29 per cent decrease respectively, compared to the first and second semesters of 2010. A 53 per cent drop in Somali asylum claims, from 3,400 in the first half of 2010 to 1,600 during the first half of 2011, partly accounted for this downward trend. A similar trend was observed for asylum-seekers from Serbia (and Kosovo: SC Res. 1244) where numbers dropped from 2,500 and 5,400 applications respectively during the first and second semesters of 2010, to below 1,500 in the first half of 2011. On average, one third of all applications registered in Sweden in 2011 by persons originating from Serbia (and Kosovo: SC Res. 1244) were lodged by Kosovars.

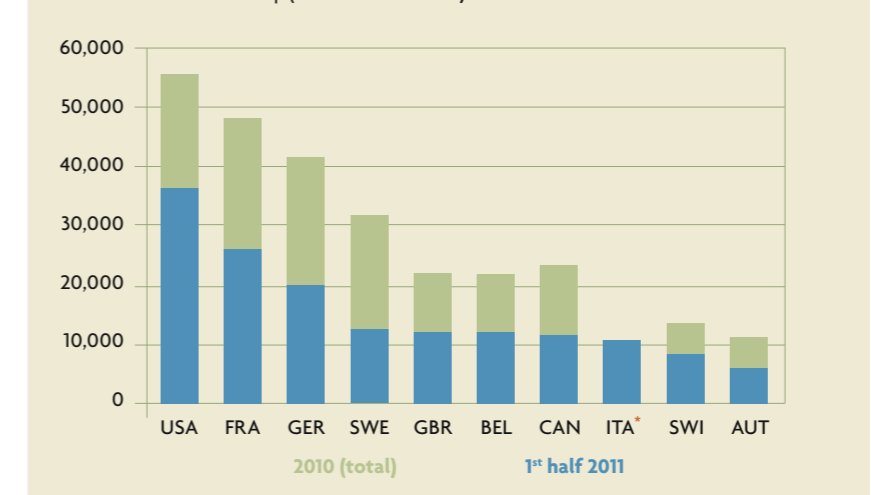

The number of asylum applications lodged in the **United Kingdom** increased by 12 per cent during the first half of 2011 (12,200 claims) compared to the same period of 2010 (10,900), making it the fifth largest recipient country in this report. Despite this increase, the first half of 2011 was the third lowest semester since UNHCR started recording monthly asylum statistics for the United

Kingdom in 1999; and this was markedly lower than in 2002 when some 47,800 individuals requested refugee status in the United Kingdom during the first part of the year. Part of the increase was attributed to larger numbers of asylum-seekers from Pakistan, moving from about 1,000 claims in the first semester of 2010 to close to 1,700 during the same period of 2011. Similarly, the number of asylum applications from Libyans increased from a total of 100 claims in all of 2010 to more than 700 during the first half of 2011. In contrast, there was a notable decrease in the number of Zimbabwean asylum-seekers: 61 per cent less during the first half of 2011 than in the first half of 2010.

Belgium received the sixth largest number of asylum-seekers during the first half of 2011 (12,000 claims): some 2,500 claims or 27 per cent more than during the first semester of 2010. About one fifth of asylum-seekers in Belgium (2,100 claims) were from Serbia (and Kosovo: SC Res. 1244). Together with asylum-seekers from Afghanistan (1,400), these two nationalities made up almost one third of Belgium's asylum-seekers. Belgium was followed by **Canada** (11,500 claims), **Italy** (10,900 claims), **Switzerland** (8,500 claims), and **Austria** (5,800 claims). As a result of arrivals of asylum-seekers by boat, the 10,900 asylum applications registered in Italy during the first half of the year were more than the 10,000 recorded during all of 2010. Tunisians accounted for one quarter of all claims in 2011.

The United States of America, France, and Germany, the top three receiving countries in the first half of 2011, together accounted for four out of ten new asylum claims submitted in industrialized countries. Together with Sweden and the United Kingdom, the top five receiving countries accounted for more than half (54%) of all asylum claims. ■

Fig. 2 Asylum claims submitted in 10 major receiving countries | (First half 2011)

* First half 2011 is higher than total of 2010.

IV

Origin of asylum-seekers

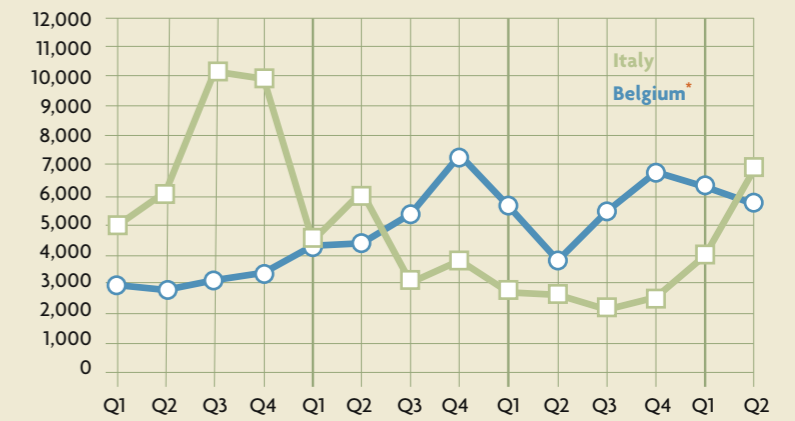

A Palestinian refugee from Iraq gets a hair cut in the Reception and Emergency Transit Centre in Timisoara, Romania.

Afghanistan, China, Serbia (and Kosovo: SC Res. 1244), Iraq, and the Islamic Republic of Iran were the five top source countries of asylum-seekers in the 44 industrialized countries in the first half of 2011 with 55,000 claims lodged by citizens of these five countries combined, accounting for 29 per cent of all claims submitted during this period. In comparison, approximately 51,900 asylum claims were submitted by citizens of Afghanistan, Serbia (and Kosovo: SC Res. 1244), China, Iraq, and the Russian Federation, the top five source countries of asylum-seekers in industrialized countries during the first half of 2010.

AFGHANISTAN was again the country of origin of the largest number of asylum-seekers in industrialized countries in the first half of 2011. Afghans lodged some 15,300 asylum claims during the first two quarters of 2011, roughly 2,500 claims more than during the same period 2010 (+20%). The increase in Afghan claims was particularly significant during the second quarter of 2011 when 8,400 applied for asylum in the 44 industrialized countries, the highest quarterly level since the first quarter of 2002 (8,600).

Although Afghans lodged asylum applications in 40 out of the 44 industrialized countries covered by this report, the distribution of claims is not spread equally across all countries. More than half of all Afghan claims were submitted in just four countries: Germany (3,800), Sweden (1,500), Belgium (1,400), and Austria (1,100).

Fig. 3 Quarterly asylum claims submitted in Belgium and Italy | 2008-2011

* 2008 and 2009 excludes accompanying children but includes repeat claims.

An increase in Afghan asylum claims was observed in most major receiving countries. In Belgium, figures almost tripled from 400 in the first half of 2010 to 1,400 a year later. While not a major receiving country for asy-

lum-seekers, Serbia¹³ registered about 1,000 Afghan asylum claims during the first semester of 2011 as opposed to 140 during all of 2010. In contrast, fewer Afghans requested international protection in Australia. Here, figures

¹³ The presentation of monthly asylum statistics of applications in Serbia does not include application lodged in Kosovo (SC Res. 1244) owing to lack of monthly data for Kosovo.

Fig. 4 Main countries of origin of asylum-seekers | First half 2011

plummeted from almost 2,000 Afghan asylum claims during the first semester of 2010 to 530 claims one year later.

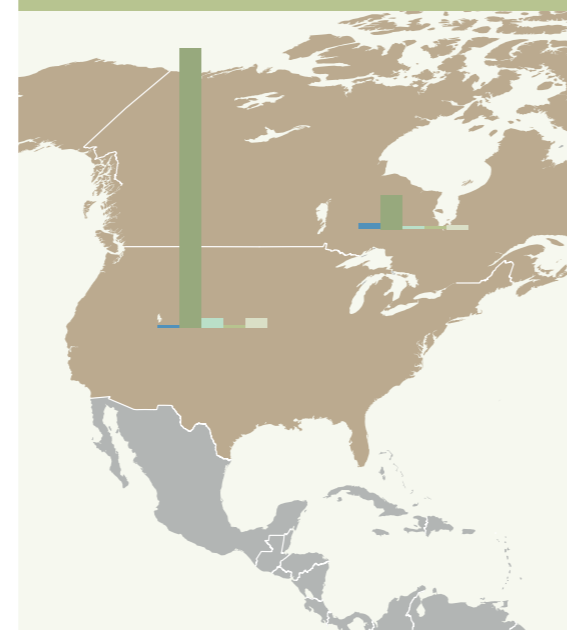

China was the second largest source country of asylum-seekers among the 44 industrialized countries. With 11,700 Chinese asylum claims lodged during the first half of 2011, 15 per cent more than the figure for the corresponding period of 2010 (10,200), semester figures are at their highest since the second half of 2003 (13,600 claims). The proportion of Chinese asylum-seekers in the total number of asylum claims has remained fairly high in past years. Chinese currently constitute 6 per cent of all asylum applications lodged in the 44 industrialized countries. As in previous years, the United States of America registered almost two thirds of all Chinese asylum applications. France was the second largest recipient with 1,000 asylum requests.

Serbia (and Kosovo: SC Res. 1244) was the third largest source country of asylum-seekers, with 10,300 applications lodged during the first half of 2011. This figure was 6 per cent below the figure reported for the first semester (11,000 claims) and 44 per cent less than for the second semester (18,600 claims) of 2010. The increase observed during 2010 is thought to be attributable to the European Union's introduction on 19 December 2009 of visa-free entry for holders of Serbian passports. France

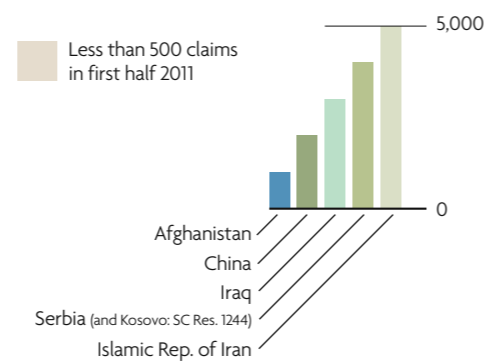

and Germany were the main recipients of asylum-seekers from Serbia, with 2,300 applications each. The decrease in asylum-seekers from Serbia was significant in Germany in 2011, where figures dropped by more than half (-55%) compared to the second half of 2010. In Belgium, the third largest recipient of asylum-seekers from Serbia in 2011, figures remained constant with about 2,100 claims in each semester. These three countries together accounted for two thirds of all asylum applications received from citizens of Serbia.

About four-fifths of the countries reporting monthly asylum statistics to UNHCR distinguish applicants from Serbia originating from Kosovo in their data. The available evidence shows that in these countries of asylum, on average, 52 per cent of applicants from Serbia come from Kosovo. Among the main receiving countries, the proportion of those applicants from Serbia originating from Kosovo is highest in France (87%) and Belgium (57%). It is relatively low in Germany (28%) and Sweden (37%).

The number of **Iraqis** requesting refugee status in the industrialized world increased slightly during the first half of 2011. Some new 10,100 asylum applications were registered during the period, about 6 per cent more (1,000) more than during the first half of 2010. Iraq was the fourth largest country of origin of asylum-seekers. Germany and

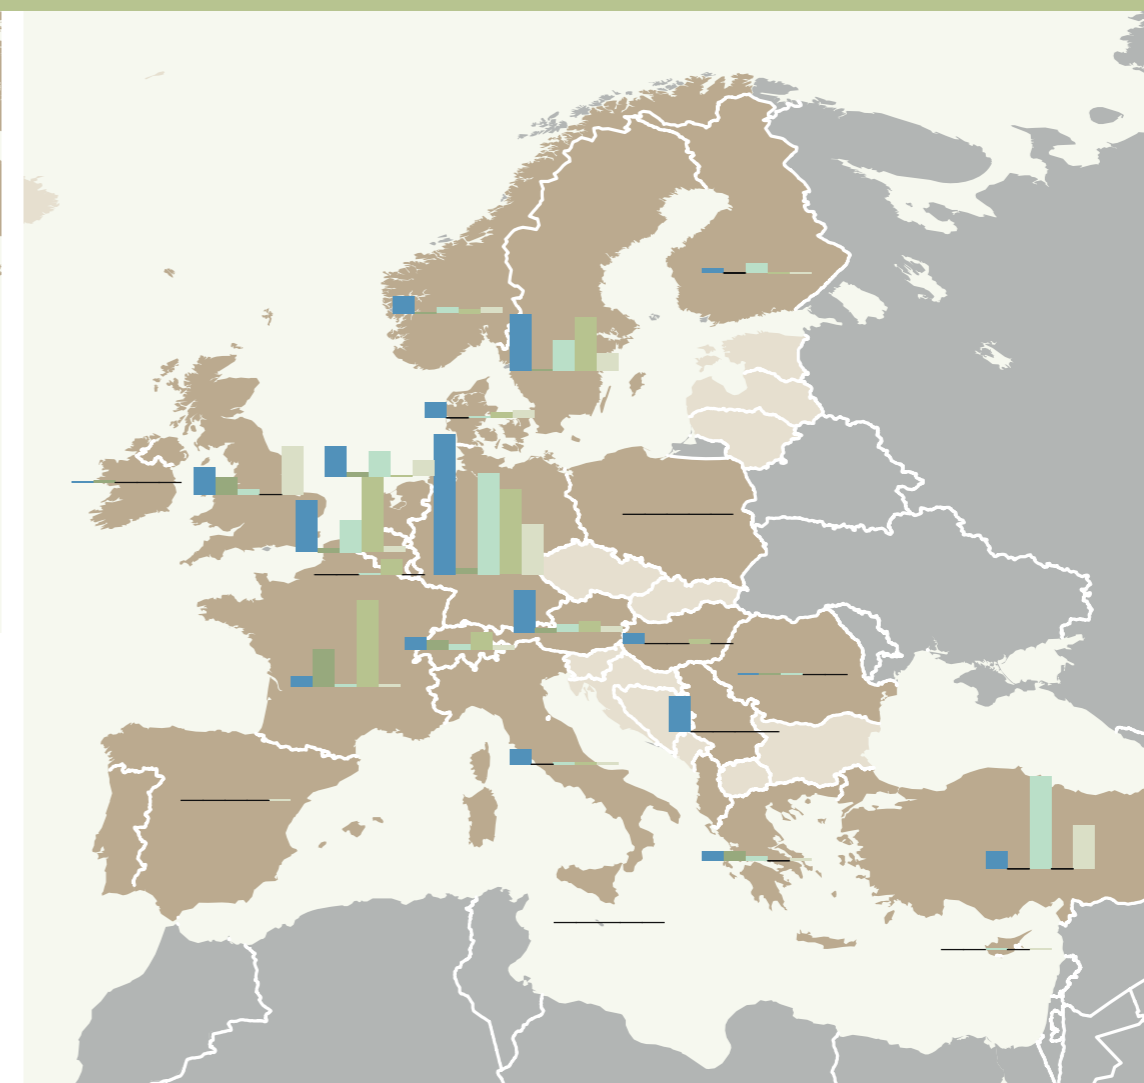

Number of asylum claims

Turkey¹⁴ together received more than half of all Iraqi asylum claims between January and June 2011. While the figure remained fairly stable in Germany at 2,600 Iraqi applications for the period, Turkey experienced a 120 per cent increase in Iraqi claims, from 1,100 in the first semester of 2010, to 2,500 during the same period of 2011.

For the first time since 2006, the **Islamic Republic of Iran** featured among the top five source countries of asylum-seekers among the group of 44 industrialized countries. Some 7,600 asylum claims were lodged by Iranian citizens in the first half of 2011, one quarter more than during the same period in 2010 (6,100 claims). Germany and the United Kingdom were the main destination countries with 1,400 and 1,300 Iranian

¹⁴ Refers to asylum applications submitted to UNHCR.

Note: This map is limited to the 44 countries which provide monthly asylum statistics to UNHCR.

Fig. 5 Iranian asylum claims lodged in 44 industrialized countries | 2000-2011

* First half 2011.

asylum claims, respectively. Both countries saw a rise in numbers during the first half of 2011. The former increased by 44 per cent, compared to the corresponding period of 2010. The latter went up by 55 per cent during the same period. A similar trend was observed in Australia where the number of Iranian asylum-seekers almost tripled, from 340 in the first half 2010, to 920 during the same period in 2011.

The Islamic Republic of Iran was followed by the **Russian Federation** (7,400 applications in first semester of 2011), **Pakistan** (7,300), **Somalia** (6,900), **Eritrea** (5,800), and **Nigeria** (5,400). Other important source countries of asylum-seekers in the 44 industrialized countries during the first half of 2011 were **Tunisia** (4,600 claims), **Mexico** (4,100), **Sri Lanka** (4,100), and **Bangladesh** (4,000).

Eritreans waiting in the port of Benghazi, Libya. Some third-country nationals living in Libya fled across the Mediterranean and claimed asylum or refugee status in Europe.

In total, 32 countries among the top-40 countries of origin showed an increase from the first semester of 2010 to the first semester of 2011. The highest relative increase was recorded for **Tunisian** citizens whose asylum claims increased from 410 to more than 4,600, primarily in the number of arrivals in Italy by boat. The first half of 2011 saw more Tunisians lodging asylum claims than during the entire period from 2004 to 2010 put together. Similarly, there was a major increase in asylum applications lodged by **Libyan** citizens, with 2,000 claims during the first half of 2011 compared to only 800 during the whole of 2010. As a result of armed conflict in Côte d'Ivoire, the number of asylum applications lodged by its citizens showed the third highest relative increase during the first two quarters of

2011, compared to the first six months of 2010: figures more than doubled from 930 to 3,300 (+258%).

Among the major source countries of asylum-seekers, significant increases were also registered by asylum applicants originating from **The former Yugoslav Republic of Macedonia** (+100%), **Mali** (+86%), **Morocco** (+70%), **Ghana** (+68%), **Pakistan** (+62%), and **Eritrea** (+60%). Conversely, among countries of origin whose nationals lodged 1,000 or more asylum claims during the first semester of 2011, major decreases were recorded among asylum applicants originating from **Georgia** (-29%), **Colombia** (-23%), the **Russian Federation** (-15%), and **Somalia** (-13%).

The distribution of asylum-seekers in industrialized countries as described above reflects general trends. However,

these figures hide the fact that certain nationalities tend to cluster in a limited number of countries. For example, more than half of all **Somali** asylum claims lodged during the first half of 2011 were submitted in Sweden (23%), Norway (16%) or the Netherlands (13%). Almost two thirds of all **Chinese** asylum applications (63%) lodged during the first semester of 2011 were submitted in the United States of America while virtually all applications lodged by **Mexican** nationals were registered in the United States of America (91%) or Canada (8%). Similarly, the 7,400 asylum applicants from the **Russian Federation** primarily submitted their claims in France (25%), Austria (15%), or Poland (14%). About four fifths of the 4,600 **Tunisian** asylum applications were lodged either in Italy (2,700) or in Switzerland (970). ■

Notes

Source: Governments, UNHCR. All figures are provisional and subject to change.

a. Country notes

Belgium: 2009 data excludes accompanying children but includes repeat applications.

Czech Republic: Figures exclude repeat applications. March 2011 data: source Eurostat. April to June 2011 data not available.

France: Includes asylum applications of minors.

Japan: Figures are UNHCR estimates.

Poland: 2009 and 2010 data includes repeat applications.

Serbia: Figures do not include applications lodged in Kosovo (United Nations Security Council Resolution 1244) due to lack of monthly data.

Switzerland: Figures exclude repeat applications.

Turkey: Source: UNHCR.

United Kingdom: Data rounded to the closest five.

United States: Figures include (1) statistics from the US Department of Homeland Security (DHS), based on the number of cases and multiplied by 1.4 to reflect the estimated number of individuals; and (2) the number of new ("defensive") requests lodged with the Department of Justice, Executive Office for Immigration Review (EOIR), based on the number of individuals.

b. Regional classification

EU-"old" (15): Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden and United Kingdom.

EU-"new" (12): Bulgaria, Cyprus, Czech Rep., Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Romania, Slovakia and Slovenia.

EU-Total (27): EU-"old" and EU-"new".

Nordic region (5): Denmark, Croatia, Iceland, Norway and Sweden.

Central Europe (11): Bulgaria, Croatia, Czech Rep., Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovakia and Slovenia.

Western Europe (19): EU-"old" plus Iceland, Norway, Liechtenstein and Switzerland.

Southern Europe (8): Albania, Cyprus, Greece, Italy, Malta, Portugal, Spain and Turkey.

Western Europe (19): EU-old plus Iceland, Liechtenstein, Norway and Switzerland.

Europe (38): All 38 European countries listed.

Non-Europe (6): All 6 non-European countries listed.

Total (44): All countries listed.

TABLE 2 Asylum applications lodged in industrialized countries by origin
| first quarter 2009 to second quarter 2011

Covering all 44 asylum countries listed in Table 1. Top-40 ranking of countries based on applications lodged during second quarter of 2011. Totals between this table and Table 1 differ because figures for the United States (DHS) by origin reflect the number of cases.
