ANNOTATED NATIONAL MATRIX

The purpose of the matrix is threefold:

- To take stock of existing developments at the national and regional level and to outline projects/initiatives on the various points of the 10-Point Plan of Action on Refugee Protection and Mixed Migration.
- To provide an overview of the country-specific situation, highlight good practices, and give a step-by-step guide on the main activities to be carried out by key actors, including UNHCR.
- To use the matrix as a strategic planning tool for the formulation and creation of better responses and to develop regional strategies on mixed movements.

Guidance notes:

The annotations in the matrix are written in *italics* and provide guidance on the information needed under each chapter of the 10 Point Plan. Once the form is complete, the italic **annotations should be deleted**. The annotations should be read together with the guidance notes in the introductory sections of the various chapters of the 10-Point Plan in Action.

Please note that this matrix is not restricted to UNHCR activities and aims. It should include any project/activity which is useful to further promote the objectives of the 10-Point Plan, even if UNHCR only has a limited role to play.

Insert general country information on refugee protection and mixed movements such as magnitude and general tendencies of movements, profile of persons in need of protection and/or assistance in respective region and particular challenges/areas of particular concern from a protection perspective which characterizes the current situation. Link background information to a brief overview of activities on mixed movements and more specifically the 10-Point Plan of Action for Refugee Protection and Mixed Migration and – if possible – give an overview of further action needed or already planned

IMPLEMENTING THE 10-POINT PLAN OF ACTION ON REFUGEE PROTECTION AND MIXED MIGRATION: Insert name of country

CHAPTER ONE

Please differentiate between cooperation at the <u>national</u> and <u>regional</u> level (also highlight examples of **cross-border cooperation**). Focus on <u>cooperation as a methodology</u> for addressing mixed movements and highlight in particular examples of <u>institutionalized cooperation</u>, for example, in the form of national/regional **protection networks or coalitions**. Also include **forms of cooperation** as appropriate, where UNHCR may not be directly involved or plays a minor role, but which are of relevance for refugee protection considerations within mixed movements.

1. Cooperation among key partners	Objectives (compare 10-Point Plan of Action	Actions (give a comprehensive outline of actions undertaken by UNHCR, as well as the roles and responsibilities of relevant partners/stakeholders)						Strategic Planning – next
	objectives and highlight national and/or regional strategies, as appropriate)	Specific Aims of Initiatives/ Projects	Ongoing Activities	Follow-up activities planned	Actors	Achievements	Constraints/ Challenges	steps and future projects

CHAPTER TWO

Highlight appropriate data collection methodologies, tools (such as databases, questionnaires, etc) and indicators to identify asylum-seekers and refugees, as well as onward movers within mixed movement and other groups with specific needs (e.g. women, children, stateless persons, trafficked persons). Highlight how accurate and reliable data can be collected in accordance with data protection standards. Describe how partners have cooperated to exchange information, describe how the analysis and review of data, e.g. on travel routes, trends and movements has helped to formulate country-specific strategies.

2. Data collection and analysis	Objectives (compare 10-Point Plan of Action objectives and, highlight national and/or regional strategies, as appropriate)	UNHCR, as well as	Actions nsive outline of action the roles and respons artners/stakeholders) Ongoing Activities	sibilities of relevant	Actors	Achievements	Constraints/ Challenges	Strategic Planning – next steps and future projects

CHAPTER THREE

Identify in particular 1) specific <u>protection legislation</u> affecting **border procedures**; 2) <u>training of stakeholders</u>, particularly border and immigration officials, 3) <u>guidelines for border personnel</u> and/or other specific tools to assist entry officials to identify asylum-seekers or other persons with specific needs, 4) measures to <u>assist and consult with partners, 5) monitoring</u> of entry points activities. Identify any other **activities in border areas**, as appropriate.

3. Protection- sensitive entry systems	Objectives (compare 10-Point Plan of Action	e 10-Point UNHCR, as well as the roles and responsibilities of relevant					Strategic Planning – next
	and/or regional	Specific Aims of Initiatives/ Projects	Ongoing Activities	Follow-up activities planned	Actors	Achievements	steps and future projects

CHAPTER FOUR

Describe which measures are in place for the initial post-arrival phase of mixed movements and how immediate needs of different categories arrivals are addressed (asylum-seekers, migrants, children, women, stateless persons, trafficked persons and other persons with specific needs). Describe arrangements that help to address basic material and psycho-social needs. If reception centers are in place, describe their location, basic characteristics, conditions and whether staff are adequately trained.

4. Reception arrangements	and/or regional	UNHCR, as well as	Actions ensive outline of actio s the roles and respons partners/stakeholders) Ongoing Activities	sibilities of relevant	Actors	Achievements	Constraints/ Challenges	Strategic Planning – next steps and future projects

CHAPTER FIVE

Describe <u>mechanisms that help to differentiate between various categories of people soon after they arrive</u> at entry points (including non-binding "screening" mechanisms).

Distinguish between 1) ad-hoc and informal mechanisms that have proven effective and 2) institutionalized mechanisms. Describe tools used to this end (such as questionnaires, SOPs etc.) Highlight joint efforts to conduct needs-assessments, counseling, and appropriate referrals.

CHAPTER SEVEN

Focus in particular on the three classic durable solutions for refugees promoted by UNHCR, i.e. 1) voluntary repatriation, 2) local integration (including self-reliance) and 3) resettlement. Highlight national and/or regional particularities and solutions based on migration framework ("temporary" or "permanent").

7. Solutions for Objectives refugees (compare 10-Point Plan of Action objectives and highlight national		UNHCR, as well as	Actions asive outline of actio the roles and respons artners/stakeholders)	sibilities of relevant	Actors	Achievements		Strategic Planning – next steps and future

CHAPTER TEN

Please describe targeted initiatives e.g. strategies to e.g. 1) inform persons about the risks of irregular migration in countries of origin and 2) strategies in host countries to sensitize communities on the root causes of mixed movements and the human suffering involved. Highlight public information activities raising awareness about the refugee component in mixed movements. In addition to activities by UNHCR, also highlight information strategies that involve a wide range of actors including, for example, awareness campaigns on human trafficking as well as toolkits that might have been developed at the national and/or regional level.
