## Asylum Trends, First half 2014

*Levels and Trends in Industrialized Countries*

**UNHCR**  
The UN Refugee Agency

# Trends at a Glance

## First half 2014 in review

↘ 47%

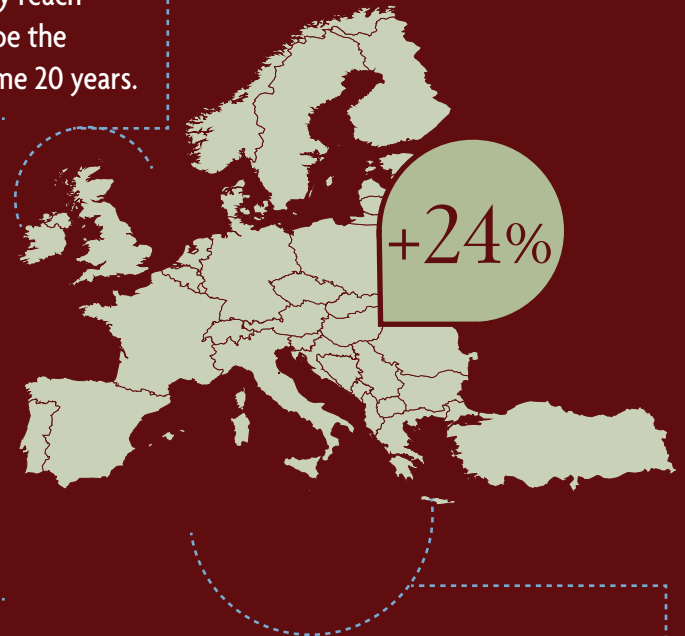

**Central Europe** was the only European region to experience a fall in asylum applications in the first six months of 2014, compared to both the first and second semesters of 2013. These figures went down by 47 per cent and 27 per cent, respectively, with decreases particularly evident in Hungary and Poland.

700,000

If the observed historical pattern of asylum applications continues, it is estimated that the number of asylum claims that will be submitted in the **44 industrialized countries** covered by this report for the whole of 2014 may reach 700,000. This would be the highest number in some 20 years.

↗ 24%

An estimated **330,700 new asylum applications** were recorded between January and June 2014, some 64,300 claims or 24 per cent more than during the corresponding period of 2013 (266,300 claims). This figure is almost identical to the figures recorded during the preceding six months, July through December 2013 (328,100).

264,000

The **38 countries in Europe** recorded **264,000** asylum applications during the first six months of 2014. This is an increase of 24 per cent compared to the corresponding period of 2013 (212,200) but 2 per cent fewer than during the second semester of 2013 (270,600 claims). Europe accounted for four-fifths (80%) of all claims lodged in the 44 industrialized countries in the first half of 2014.

The **28 Member States of the European Union** registered 216,300 asylum claims during the first half of 2014, a 23 per cent increase compared to the corresponding period of 2013 (176,200). These 28 States together accounted for 82 per cent of all new asylum claims registered in Europe.

↗ 73%

Among the European regions, the largest relative increase in mid-year asylum levels was reported by countries in **Southern Europe**. These countries received 60,800 asylum requests during the first half of 2014, a 73 per cent increase compared to the first six months of 2013 (35,200 claims). This growth was mostly due to the number of individuals who requested international protection in Italy and Turkey.

↗ 27%

In **North America**, an estimated **58,600** new asylum applications were submitted during the first six months of 2014, an increase of 12,500 claims or 27 per cent compared to the same period in 2013 (46,100 claims). Canada registered 5,800 new applications (+29%), while the United States of America recorded approximately 52,800 claims (+27%).

2,200

**Japan** registered 2,200 new asylum applications during the first half of 2014, while the **Republic of Korea** recorded 1,000 claims. Although such figures are the highest on record in both countries, these numbers continue to be modest in comparison to other industrialized countries.

↗ 48,400

By and large, the **Syrian Arab Republic** remained the main country of origin of asylum-seekers in industrialized countries. Provisional data indicate that some 48,400 Syrians requested refugee status in the first half of 2014, significantly more than during the first half (18,900 claims) or the second half of 2013 (37,500). If current trends continue, it is likely that the total number of Syrians requesting international protection among the group of 44 industrialized countries will surpass the 2013 level significantly.

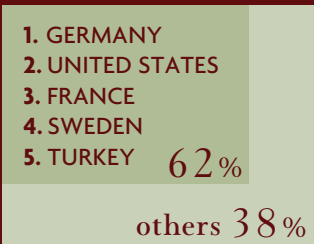

5,700

4,600

The reported number of new asylum-seekers in **Australia** decreased by 20 per cent during the first half of 2014 (4,600 claims) compared to the previous year (5,700). In **New Zealand**, 140 asylum applications were registered during the reporting period.

65,700

With **65,700** new asylum applications registered during the first half of 2014, **Germany** was the largest single recipient of new asylum claims among the group of industrialized countries.

The **United States of America** was second with 52,800 asylum applications, followed by **France** (29,000), **Sweden** (28,500), and **Turkey** (27,700). The top five receiving countries together accounted for 62 per cent of all asylum claims received by the countries included in this report.

1. SYRIAN ARAB REPUBLIC
2. IRAQ
3. AFGHANISTAN
4. ERITREA
5. SERBIA (AND KOSOVO: S/RES/1244 (1999))

The **Syrian Arab Republic** was followed by **Iraq** (21,300 claims), **Afghanistan** (19,300 claims), **Eritrea** (18,900 claims), and **Serbia (and Kosovo: Security Council resolution 1244 (1999))**<sup>(1)</sup> (12,300 claims). Persons from these five countries together accounted for 120,100 applications or 37 per cent of all asylum claims submitted in industrialized countries.

<sup>(1)</sup> Henceforth referred to in this document as "Serbia (and Kosovo: S/RES/1244 (1999))".

**Coming from a range of countries in the Middle East and Africa**, these asylum-seekers and migrants disembark on the Italian island of Sicily, relieved to have made the journey alive. Many have fled Libya, Somalia and the Syrian Arab Republic, and UNHCR is present to help determine who may be in need of international protection.

# Introduction

*This report summarizes patterns and trends in the number of individual asylum claims submitted in Europe and selected non-European countries during the first six months of 2014. The data in this report are based on information available as of 3 September 2014, unless otherwise indicated. These data cover the 38 European and six non-European States that currently provide monthly asylum statistics to UNHCR. Figures are mostly based on official asylum statistics, reflecting national laws and procedures.*

**T**HE GROUP of countries analysed in this report is collectively referred to as “the 44 industrialized countries”, and has been defined for the purpose of this report only. The 44 countries are: the 28 Member States of the European Union,<sup>(2)</sup> Albania, Bosnia and Herzegovina, Iceland, Liechtenstein, Montenegro, Norway, Serbia (and Kosovo: S/RES/1244 (1999)), Switzerland, the former Yugoslav Republic of Macedonia, and Turkey, as well as Australia, Canada, Japan, New Zealand, the Republic of Korea, and the United States of America. This group of 44 countries received an estimated 330,700 new asylum applications in the first half of 2014.

The numbers in this report reflect new claims made at the first instance of asylum procedures. These figures include neither applications on appeal or review, nor information on the outcome of asylum procedures or on the admission of refugees

through resettlement programmes.

To the extent possible, the statistics presented reflect the number of individuals lodging an asylum application for the first time during the first six months of 2014. However, some of the figures quoted in this report are likely to include repeat applications submitted in the same or another country, and therefore may not reflect the actual number of new asylum-seekers during the period.<sup>(3)</sup>

All data refer to the number of individuals with the exception of asylum-seekers in the United States of America, where figures are available only for the number of cases (which may include several individuals) submitted to the United States Department of Homeland Security (DHS). However, applications submitted to the Executive Office of Immigration Review (EOIR) of the United States Department of Justice are recorded as individuals. To allow comparability across countries of asylum, UNHCR uses an average figure of

1,356 individuals per case to estimate the number of individuals reported by DHS for 2013, because data suggest that, on average, one asylum case involves 1,356 individuals. In the tables on country of origin, figures for the United States of America are a combination of the number of cases (DHS) and the number of individuals (EOIR), owing to the large variation in family size by nationality.

All figures in this report should be considered as provisional and subject to change. Due to retroactive changes and adjustments, some of the data included in this publication may differ slightly from that reported in previous UNHCR documents, or from the official figures published by States. ■

<sup>(2)</sup> See Annex Table 1 for a list of countries.

<sup>(3)</sup> According to EURODAC (an EU-wide fingerprint database), 29.2 per cent of all asylum claims registered in the system in 2013 were multiple claims, i.e. the applicant had submitted at least one previous application in the same or another Member State of the European Union. This compares to 27.5 per cent in 2012. See: <http://goo.gl/SV7RJu>.

**This Syrian woman** who has found refuge in Turkey chats via Skype with relatives in Australia. She is being hosted, together with her family, in a Syriac Christian community church.

# Overview of regional trends

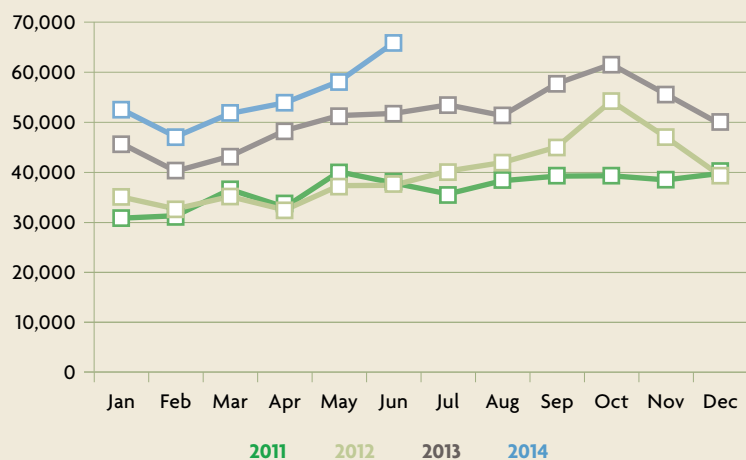

War, armed conflict, and human rights concerns in a number of countries – notably the Syrian Arab Republic and Ukraine – are among the principal reasons for the upsurge in the number of asylum-seekers in industrialized countries observed during the first half of 2014. An estimated 330,700 new asylum applications were recorded between January and June 2014, some 64,300 claims or 24 per cent more than during the corresponding period of 2013 (266,300 claims). This figure is almost identical to the figures recorded during the preceding six months of July through December 2013 (328,100).

IF THE OBSERVED HISTORICAL PATTERN of asylum applications continues, it is estimated that the number of asylum claims that will be submitted in the 44 industrialized countries for the whole of 2014 may reach 700,000. This would be the highest number in some 20 years.

The 38 European countries<sup>(4)</sup> included in this report recorded 264,000 asylum applications during the first six months of 2014. This figure was 24 per cent higher than during the corresponding period of 2013 (212,200 claims) but 2 per cent lower than during the second semester of 2013 (270,600). Europe accounted for four-fifths (80%) of all claims lodged in the 44 industrialized countries in the first half of 2014.

The 28 Member States of the European Union registered 216,300 asylum claims during the first half of

Fig. 1 New asylum claims lodged in 44 industrialized countries | 2011 - 2014

(4) See notes in Annex Table 1 for a list of countries included under this regional grouping.

2014, a 23 per cent increase compared to the corresponding period of 2013 (176,200). These 28 States together accounted for 82 per cent of all new asylum claims registered in Europe.

Southern Europe reported the largest relative increase in mid-year asylum levels among the European regions.<sup>(5)</sup> This region received 60,800 asylum requests during the first half of 2014, a 73 per cent increase compared to the first six months of 2013 (35,200 claims). This increase was essentially in the number of individuals who requested international protection in Italy and Turkey. The former registered 24,500 new asylum claims, many of whom arrived by boat, while the number of asylum applications registered by UNHCR in Turkey exceeded 27,700 during the reporting period.<sup>(6)</sup>

Central Europe<sup>(7)</sup> was the only European region to experience a fall in asylum applications in the first six months of 2014, compared to both the first and second semesters of 2013. These figures went down by 47 per cent and 27 per cent, respectively, with decreases being particularly evident in Hungary and Poland. Here, figures dropped from a high of 11,600 (Hungary) and 9,700 applications (Poland) registered during the first half of 2013 to 4,800 and 3,400, respectively. Overall, countries in Central Europe registered 13,400 asylum applications during the first semester of 2014.

The Nordic region<sup>(8)</sup> remained a major destination for asylum-seekers in Europe, with 38,900 new asylum applications registered during the first half of 2014, some 10,300 claims or 36 per cent more than one year earlier (28,600). The current reporting period, however, falls short of the number re-

**TABLE 1** New asylum claims lodged in selected regions by semester | 2013 - 2014

Regions	1 <sup>st</sup> 2013	2 <sup>nd</sup> 2013	1 <sup>st</sup> 2014	Change	
				1 <sup>st</sup> 2013-1 <sup>st</sup> 2014	2 <sup>nd</sup> 2013-1 <sup>st</sup> 2014
Europe	212,200	270,600	264,000	24.4%	-2.4%
- EU-28	176,200	220,300	216,300	22.8%	-1.8%
United States/Canada	46,100	48,700	58,600	27.1%	20.3%
Japan/ Rep. of Korea	2,100	2,700	3,300	57.1%	22.2%
Australia/ New Zealand	5,900	6,100	4,700	-20.3%	-23.0%
<b>Total</b>	<b>266,300</b>	<b>328,100</b>	<b>330,600</b>	<b>24.1%</b>	<b>0.8%</b>

See notes in Annex Table 1 for list of countries included.

corded in the second half of 2013, when a total of 47,800 asylum applications were registered across the region (-19%). Sweden remained by far the largest recipient, with 28,500 asylum applications registered in the first half of the year compared to 18,900 applications a year earlier (+51%). As such, Sweden accounted for three-quarters of all new asylum claims recorded in the region.

The number of asylum claims submitted in North America during the first six months of 2014 (58,600) increased by one quarter compared to the corresponding period the previous year. The figures show a similar trend for Canada and the United States of America, albeit at a different scale. The former registered 5,800 new applications during the reporting period, almost one third (+29%) more than during the first half of 2013 (4,500). The latter recorded approximately 52,800<sup>(9)</sup> claims, an estimated 11,200 claims more than in 2013 (+27%). China remained the main country of origin of asylum-seekers registered in both countries.

In Australia, close to 4,600 asylum claims were registered during the first half of 2014, down 20 per cent

from the corresponding period of 2013 (5,700 claims).<sup>(10)</sup> One third of asylum-seekers in Australia originated from China or India. In New Zealand, levels continue to be fairly low and stable, with 140 asylum applications filed during the first half of 2014.

Japan registered more than 2,200<sup>(11)</sup> new asylum applications in the first part of 2014, a 38 per cent increase compared to the first half of 2013 (1,600 claims). The Republic of Korea registered 1,000 claims between January and June 2014, a doubling compared to the first half of 2013 (510 claims). These are the highest levels on record in both countries. Individuals seeking international protection in Japan were predominantly from Nepal and Turkey, while Egypt, Pakistan, and the Syrian Arab Republic were the main countries of origin of asylum-seekers in the Republic of Korea. ■

(5) Refers to Albania, Cyprus, Greece, Italy, Malta, Portugal, Spain, and Turkey.

(6) This figure includes asylum-seekers registered with UNHCR as well as asylum-seekers who have been pre-registered but who are pending official registration with UNHCR. As of early September 2014, there were some 832,000 registered Syrian refugees in Turkey covered by the Government's Temporary Protection Regime. The number of Syrian asylum-seekers included in this report covers only those who, for specific reasons, have been referred to UNHCR for further evaluation of their international protection needs.

(7) Refers to Bulgaria, Croatia, Czech Rep., Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovakia, and Slovenia.

(8) Refers to Denmark, Finland, Iceland, Norway, and Sweden.

(9) Estimated number of individuals based on the number of new cases (28,087) and multiplied by 1.356 to reflect the average number of individuals per case (Source: US Department of Homeland Security), and the number of new 'defensive' asylum requests lodged with the Executive Office of Immigration Review (14,749 individuals).

(10) Australian figures are based on the number of applications lodged for protection visas.

(11) Monthly asylum data for Japan is available from 2002. Figures for Japan are UNHCR estimates.

## Countries of asylum

*Having registered a combined 203,700 asylum claims during the first half of 2014, Germany, the United States of America, France, Sweden, and Turkey were the top five receiving countries during that period. Together they accounted for six out of ten (62%) asylum claims submitted in the 44 industrialized countries covered by this report, a ranking identical to 2013. By comparison, during the first half of 2013 some 151,500 claims were registered in these five countries.*

**I**N 2013, Germany registered 109,600 new asylum applications. This figure made Germany, for the first time since 1999, the largest single recipient of new asylum claims among industrialized countries as well as worldwide. This high level has continued into the first part of 2014, with German authorities registering 65,700 new asylum applications, compared to 43,300 recorded during the corresponding period of 2013 (+52%). At current trends Germany is likely to exceed last year's figure, which would constitute the seventh consecutive annual increase.

Germany's 2013 level is partly attributable to a higher number of individuals from the Syrian Arab Republic, Serbia (and Kosovo: S/RES/1244 (1999)), Eritrea, and Albania requesting international protection. Reflecting the deteriorating humanitarian situation in the Syrian Arab Republic, applications

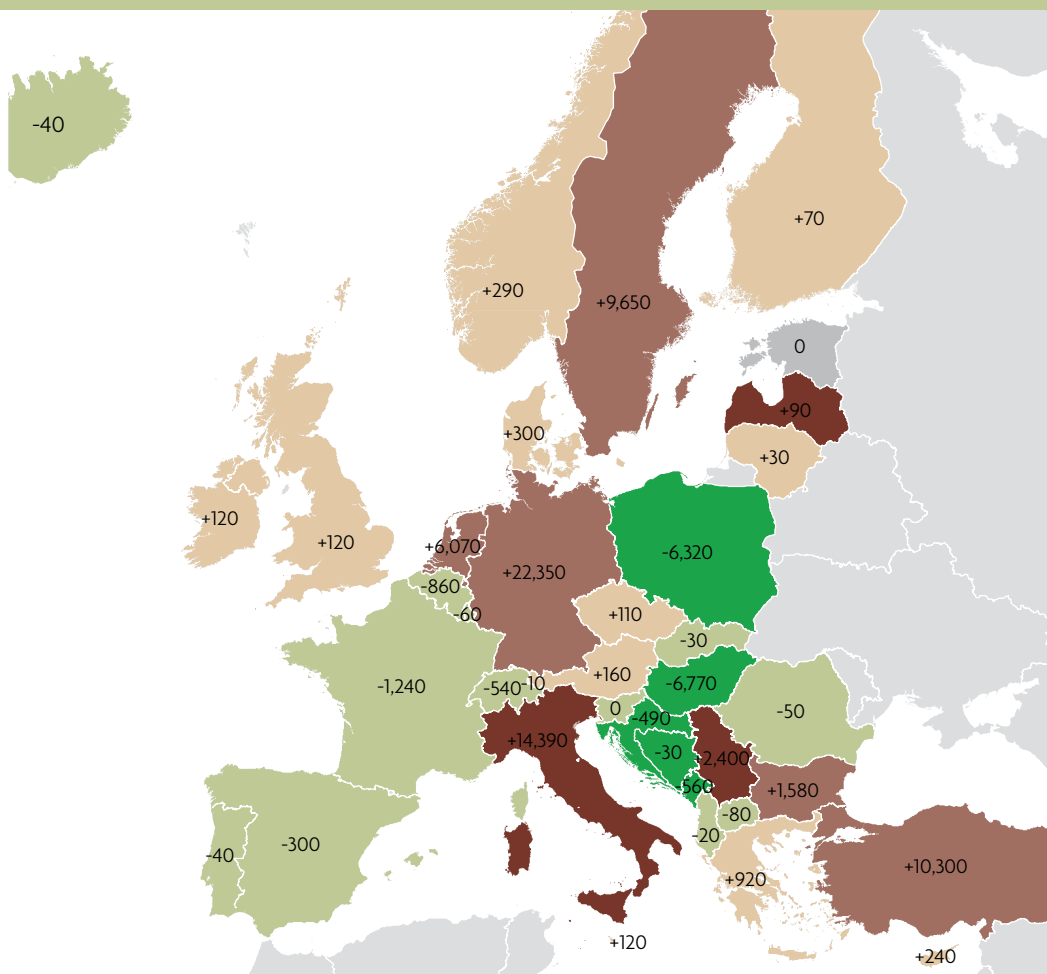

from that country in Germany more than doubled from 4,500 new asylum claims in the first half of 2013 to almost 11,800 a year later. On average, one out of every five asylum claims in Germany was lodged by Syrians.

Applications in Germany lodged by individuals from Serbia (and Kosovo: S/RES/1244 (1999)) also more than doubled, from 3,700 to 8,000. Eritrean and Albanian asylum claims likewise increased 12-fold, from 310 to 3,800 each during the same period. In contrast, asylum applications from the Russian Federation plummeted from 10,000 during the first part of 2013 to 2,200 a year later. Overall, the Syrian Arab Republic was the top country of origin of asylum-seekers in Germany,

followed by Serbia (and Kosovo: S/RES/1244 (1999)) and Eritrea. On average, every fifth application in the 44 industrialized countries was received by Germany.

The United States of America was the second largest single recipient of new asylum claims during the first six months of 2014, with an estimated 52,800<sup>(12)</sup> asylum claims registered, despite a 27 per cent increase (+11,200 claims) compared to the corresponding period the previous year. Asylum-seekers from Mexico and Central America primarily accounted for this increase, together totalling 16,000 or 38 per cent of all applications. This proportion has consistently increased in recent years, reflecting the deteriorating situation in the region as a result of

<sup>(12)</sup> Figures include statistics from the US Department of Homeland Security (DHS), based on the number of cases and multiplied by 1.356 to reflect the estimated number of individuals, and the number of new ('defensive') requests lodged with the US Department of Justice, Executive Office for Immigration Review (EOIR), based on the number of individuals. DHS data for 2013 and 2014 is based on the number of cases and multiplied by 1.356 to reflect the estimated number of individuals during this period.

**Increase and decrease of asylum claims**

- Increase over 100%
- Increase 50% to 100%
- Increase up to 50%
- Decrease up to 50%
- Decrease 50% to 100%

**Note:** This map is limited to the 44 countries which provide monthly asylum statistics to UNHCR. All figures are rounded off to the closest ten. Colour shadings show relative increase /decrease whereas values show absolute increase/decrease.

violence generated by transnational organized crime, gang-related violence, and drug cartels in some parts of Central America. Still, China remained the main country of origin of asylum-seekers with more than 6,400 claims registered in the first half of the year, virtually unchanged from the corresponding period

in 2013 (6,300 claims). China was followed by Mexico (6,200 claims), El Salvador (3,800), Guatemala (3,800), and Honduras (2,300).

France ranked third among the 44 industrialized countries, with 29,000 new asylum applications registered during the first half of 2014. In contrast to many other European countries, this figure constituted a decrease of 4 per cent compared to the corresponding period of 2013 (30,300). This decrease was partly attributable to a halving of asylum claims from Serbia (and Kosovo: S/RES/1244 (1999)), from 3,100 in the first half of 2013 to about 1,600 claims a year later. Similarly, asylum claims from the Russian Federation and Albania dropped to 1,800 (-26%) and 1,600 (-31%), respectively. Following the trend in other European countries, the number of Syrian asylum applications more than doubled, from 600 to 1,400 during the same period. The Democratic Republic of the Congo remained the top country of origin of asylum-seekers in France with close to 3,100 asylum claims

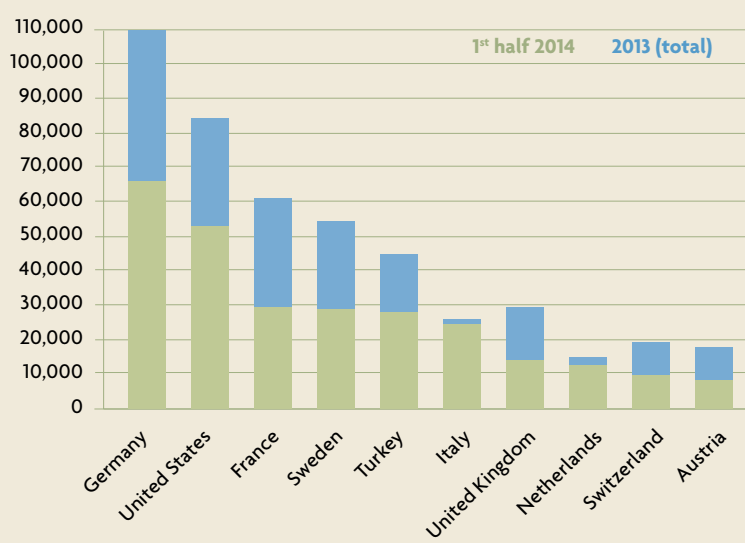

“ With the number of boat arrivals in Italy remaining very high, new asylum applications registered in that country during the first half of 2014 continued to grow. About 24,500 claims were registered during the first six months of the year, almost identical to the total number of applications lodged during the entire previous year (25,700). ”

registered in the first semester of 2014, an increase of 19 per cent.

Sweden ranked fourth among the 44 industrialized countries, with 28,500 new asylum applications received during the first six months of 2014. This corresponded to increases of 51 and 75 per cent, respectively, compared to the first semesters of 2013 and 2012. Nevertheless, the first half of 2014 recorded 6,900 fewer asylum claims than the second half of 2013 (-19%). Still, the consistently high number of Syrian asylum applications contributed to the high number of asylum-seekers in Sweden. Some 11,600 Syrians requested refugee status during the reporting period, identical to the second half of 2013 but a more than doubling compared to the first half of last year (4,700 claims). Eritreans lodged 3,400 asylum applications during the reporting period, three times more than during the corresponding period a year earlier (1,200). The number of asylum applicants reported as being stateless by the Swedish Migration Board more than doubled, from 1,200 to 2,500 applications during the same period.

Turkey was the fifth largest recipient of applications among the 44 industrialized countries, with 27,700 new asylum requests registered during the first half of 2014.<sup>(13)</sup> This is a 59 per cent increase compared to the first half of 2013 (17,400 claims) and the highest half-year value on record. Iraqi asylum-seekers primarily accounted for this increase, with their number almost doubling from 8,000 in the first half of 2013 to 15,700 a year later. As a consequence, Iraqis lodged more than half (57%) of all asylum claims registered by UNHCR in Turkey. Other important source countries of asylum applicants in Turkey were Afghanistan (4,300 claims) and the Islamic Republic of Iran (2,700 claims).

Fig. 2 **New asylum claims lodged in 10 major receiving countries | First half 2014**

With the number of boat arrivals in Italy remaining very high, new asylum applications registered in that country during the first half of 2014 continued to grow. About 24,500 claims were registered during the first six months of the year, almost identical to the total number of applications lodged during the entire previous year (25,700). Italy was thus the sixth largest receiving country during the reporting period. Malian, Nigerian, Gambian, and Senegalese asylum-seekers primarily accounted for this rise, due to a sevenfold (Mali, Gambia, and Senegal) and fourfold (Nigeria) increase in asylum claims. Mali was the leading country of origin of asylum-seekers in Italy during the reporting period (4,700 claims), followed by Nigeria (3,400 claims) and Gambia (3,300 claims).

As recipients of asylum applications during the first half of 2014, Italy was followed by the United Kingdom (14,300 claims), the Netherlands (12,300), Switzerland (9,500), and Austria (8,400). With the exception of the Netherlands, the number of new asylum applications remained relatively stable in the other three countries during the first half of 2014 compared to its corresponding period of 2013. The Dutch authorities reported a doubling of new asylum claims during the first half of the year, largely accounted for by Eritrean and Syrian asylum-seekers. Eritreans lodged 3,500 asylum claims in the first six months of 2014 (up from 260 one year earlier), while Syrians submitted 3,700 new applications (up from 760). ■

(13) Figures include asylum-seekers registered with UNHCR as well as asylum-seekers who have been pre-registered but who are pending official registration with UNHCR.

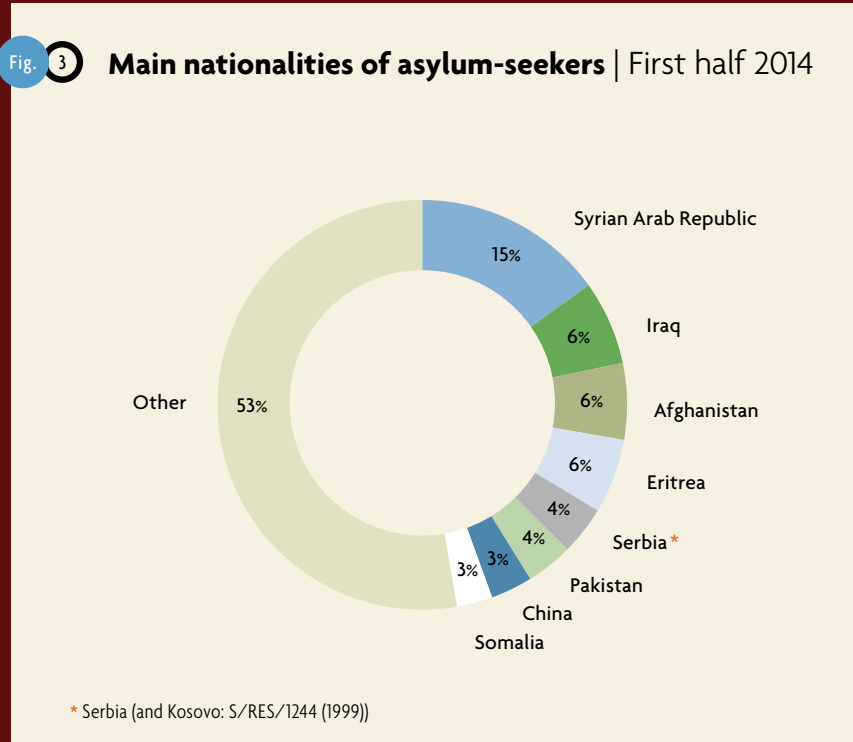

**This Syrian refugee woman**, who is almost blind, escaped the war with her two young sons. Reflecting on their arrival in Greece almost one year ago, they gaze out into the same waters that they traversed to reach Europe.

# Origin of asylum-seekers

The Syrian Arab Republic, Iraq, Afghanistan, Eritrea, and Serbia (and Kosovo: S/RES/1244 (1999)) were the top five source countries of asylum-seekers in the 44 industrialized countries in the first half of 2014. Combined, persons originating from these five countries lodged 120,100 claims, accounting for 37 per cent of all claims submitted during this period. With the exception of the Russian Federation, this ranking is comparable to the first half of 2013, when the Russian Federation, the Syrian Arab Republic, Afghanistan, Serbia (and Kosovo: S/RES/1244 (1999)), and Iraq were the top-ranking source countries. Among the top five countries of origin in 2014, four are currently experiencing violence, conflict, or human rights concerns.

**B**Y AND LARGE, the Syrian Arab Republic remained the main country of origin of asylum-seekers in industrialized countries, as the armed conflict further deteriorated in the course of 2014. Provisional data indicate that some 48,400 Syrians requested refugee status in the first half of 2014, significantly more than during the first half (18,900 claims) or second half of 2013 (37,500). At current trend, it is likely that the total number of Syrians requesting international protection among the group of 44 industrialized countries will surpass the 2013 level significantly. Last year, some 56,300 Syrians lodged new asylum claims.

Syrians lodged asylum claims in all but one of the 44 industrialized countries (Lithuania) during the first half of 2014. As such, they accounted on average for one out of

**This Syrian asylum-seeker** represents one of thousands of “red card holders” living in Greece without State support. Unable to see the way forward, he struggles to care for his wife and two children one day at a time.

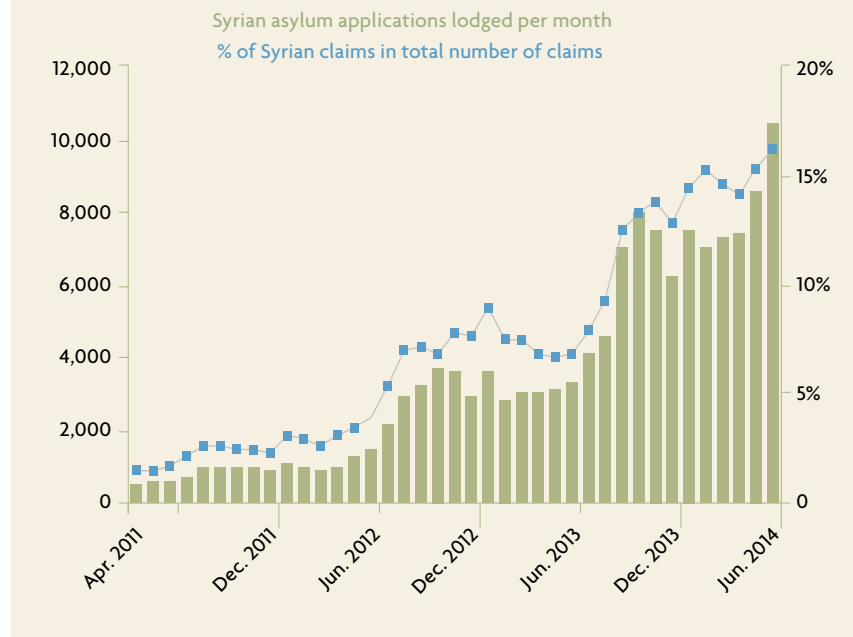

Despite the fact that Syrians constituted the largest group of asylum-seekers among industrialized countries in 2014, their number remains modest compared to the number of Syrian refugees hosted by countries in the Middle East. The total number registered or awaiting registration in Egypt, Iraq, Jordan, Lebanon, and Turkey had surpassed the 3 million mark at the time of writing this report. ●

every seven new asylum claims, as compared to one in every 10 during 2013. These levels continued to be highest in Germany (11,800 claims) and Sweden (11,600), where figures more than doubled compared to the first half of 2013. Other important destination countries were the Netherlands (3,700 claims), Switzerland (2,200), Austria (2,200), and Bulgaria (2,100).<sup>(14)</sup> In contrast to many other countries that reported increases in Syrian asylum-seekers between the first and second half of 2013 and on into the first half of 2014, a reverse trend was observed in Bulgaria. While figures increased from 720 to 3,700 asylum applications between the first and second half of 2013, they subsequently dropped to 2,100 claims in the current reporting period.

Iraq was the second largest source of asylum-seekers among the 44 industrialized countries. With 21,300 Iraqi asylum claims lodged during the first half of 2014, figures are 56 per cent higher than during the corresponding

**Fig. 4** New Syrian asylum applications lodged in 44 industrialized countries | April 2011 - June 2014

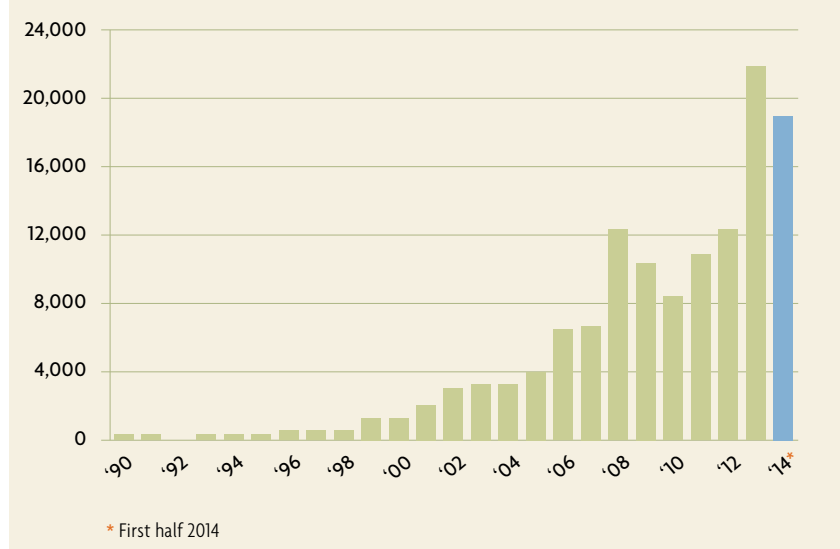

period of 2013 (13,600 claims) but 10 per cent lower than during the second half of 2013 (23,700). Turkey remained the main destination country for Iraqi asylum-seekers, with three-quarters of all Iraqi asylum claims lodged during the first half of 2014 having been registered in that country. Other important destination countries were Germany (1,800 claims) and Italy (460).

Afghanistan was the third largest country of origin of asylum-seekers in industrialized countries in the first half of 2014. Afghans lodged some 19,300 asylum claims during the first two quarters of 2014, roughly 2,500 more than during the same period in 2013 (+15%) but virtually identical to the number during the second half of 2013 (19,200 claims). Turkey remained the prime destination for Afghan asylum-seekers with 4,300 claims registered during the first half of 2014, a figure that remained constant compared to the previous two semesters in 2013 (4,300 and 4,400 applications, respectively). Germany and Hungary were other important destination countries for Afghan asylum-seekers, with 4,100 and 2,000 new asylum applications, respectively.

The number of Eritrean asylum-seekers reached unprecedented levels among the group of 44 industrialized countries. The figure was at its highest with close to 19,000 asylum applications registered during the first half of 2014, more than three times more

**Fig. 5** Eritrean asylum claims lodged in 44 industrialized countries | 1990 - 2014

<sup>(14)</sup> In addition, Turkey registered about 2,500 Syrian asylum applications. This number covers only those who, for specific reasons, have been referred to UNHCR for further evaluation of their international protection needs. As of early September 2014, there were some 832,000 registered Syrian refugees in Turkey covered by the Government's Temporary Protection Regime.

© UNHCR / CHEIL WORLDWIDE

**Refugees have for decades** remained largely invisible to the people of the Republic of Korea. By the end of 2013, more than 6,600 people had sought asylum in the Republic of Korea from countries such as Myanmar, Pakistan and the Syrian Arab Republic. To shed light on their struggle and inspire people to support the refugee cause, UNHCR, the company Cheil Worldwide and the Seoul Museum of Art joined together earlier this year to hold a 3D refugee figurine exhibit in Seoul.

(+229%) than during the first two quarters of 2013 (5,700 claims) and 18 per cent higher than during the last two quarters of 2013 (16,000). The increase in Eritrean asylum claims was particularly significant during the last quarter of 2014, when 14,600 applied for asylum in the 44 industrialized countries, the highest quarterly level for this nationality ever recorded.

Although Eritreans lodged asylum applications in 34 out of the 44 industrialized countries, the distribution of claims is not spread equally across all countries. Roughly three quarters of all Eritrean claims were submitted in just four countries: Sweden (4,200), Germany (3,800), the Netherlands (3,500), and Switzerland (2,200).

In contrast to the four countries of origin of asylum-seekers previously discussed, those originating from Serbia (and Kosovo: S/RES/1244 (1999)) lodged fewer asylum claims during the first half of 2014 than during the corresponding period last year. Some 12,300 asylum claims were recorded, roughly 3,500 claims fewer than during the first half of 2013 and 6,500 fewer

than during the second half of 2013. Figures have plummeted in particular in Hungary, which reported registering 5,300 asylum applications from Serbia (and Kosovo: S/RES/1244 (1999)) in the first half of 2013 but only 450 claims one year later. Germany was the main recipient of asylum-seekers from Serbia (and Kosovo: S/RES/1244 (1999)) during the reporting period with 8,000 asylum applications, followed by France (1,600) and Sweden (800).

With 11,900 applications submitted by asylum-seekers from Pakistan during the first two quarters of 2014, this figure is at par with the first half of 2013, when 12,100 applications were lodged. This is the third highest semester value on record, making Pakistan the sixth largest source country of asylum-seekers in the industrialized world. With 2,900 claims, Italy registered one quarter of all asylum-seekers from Pakistan during the reporting period, as compared to 1,200 claims one year earlier (+139%). The United Kingdom and Germany were the other two main destination countries, with some 2,100 asylum applications registered in the

former (-9%) and 1,800 claims in the latter (+4%).

Pakistan was followed by China, the country of origin of 10,600 applications during the first semester of 2014, as well as Somalia (9,100), Nigeria (8,900), and the Russian Federation (8,600). Other important source countries of asylum-seekers in the 44 industrialized countries during the first half of 2014 were Albania (8,400 claims), the Islamic Republic of Iran (8,000), Mali (6,500), and Mexico (6,300).

In total, 27 of the top 40 countries of origin showed an increase in applications from the first semester of 2013 to the first semester of 2014. The highest relative increase was recorded for Ukrainians, whose asylum claims increased from 700 to 4,100, reflecting the outbreak of conflict in that country. Indeed, the first half of 2014 saw more Ukrainians lodging asylum claims than during the three preceding years together. About 820 Ukrainians lodged asylum applications in Poland during the reporting period, while the United States of America and Italy recorded 520 and 350 applications, respectively. ■

**TABLE 1** Quarterly asylum applications lodged in 44 industrialized countries

| First quarter 2012 to second quarter 2014

## Notes

### a. Country notes

- Australia.** Australian figures are based on the number of applications lodged for protection visas.
- Belgium.** Figures include accompanying children but exclude repeat applications.
- Canada.** Source: Citizenship and Immigration Canada.
- Cyprus.** In addition, UNHCR registered asylum applications in the northern part of Cyprus in 2012 (96), 2013 (113) and 2014 (15).
- France.** Includes asylum applications of minors.
- Japan.** Figures are UNHCR estimates.
- Luxembourg.** Data prior to 2013 includes repeat applications.
- Spain.** Includes applications lodged at Spanish embassies.
- Sweden.** Data prior to 2014 includes repeat applications.
- Turkey.** UNHCR is the source of the data. The 2012 figure has been revised to include all asylum-seekers, both those pre-registered and those registered on a monthly basis. The 2013 figure includes asylum-seekers registered with UNHCR as well as asylum-seekers who have been pre-registered but who are pending official registration with UNHCR. As of early September 2014, there were some 832,000 registered Syrian refugees in Turkey covered by the Government's Temporary Protection Regime. The number of Syrian asylum-seekers included in the annex tables covers only those who for specific reasons have been referred to UNHCR for further evaluation of their international protection needs.

**United States of America.** Figures include (1) statistics from the US Department of Homeland Security (DHS), based on the number of cases and multiplied by 1.356 to reflect the estimated number of individuals; and (2) the number of new ("defensive") requests lodged with the Department of Justice, Executive Office for Immigration Review (EOIR), based on the number of individuals. DHS data for 2013 and 2014 is based on the number of cases and multiplied by 1.356 to reflect the estimated number of individuals during this period. A factor of 1.106 has been applied for 2012 data.

### b. Regional classification

- EU-Total (28).** All Member States of the European Union as at 1 July 2013.
- Nordic region (5).** Denmark, Finland, Iceland, Norway and Sweden.
- Central Europe (11).** Bulgaria, Croatia, Czech Rep., Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovakia and Slovenia.
- Southern Europe (8).** Albania, Cyprus, Greece, Italy, Malta, Portugal, Spain and Turkey.
- Europe (38).** All 38 European countries listed.
- Non-Europe (6).** All 6 non-European countries listed.
- North America (2).** Canada and United States of America.
- Total (44).** All countries listed.

**TABLE 2 Asylum applications lodged in industrialized countries by origin**

| First quarter 2012 to second quarter 2014

Covering all 44 asylum countries listed in Table 1. Top-40 ranking of countries based on applications lodged during second quarter of 2014. Totals between this table and Table 1 differ because figures for the United States (DHS) by origin reflect the number of cases.

**TABLE 8 Asylum applications lodged in Canada and the United States by origin**

| First quarter 2012 to second quarter 2014

Top-40 ranking of countries based on applications lodged during second quarter of 2014.

Totals between this Table and Table 1 differ because figures for the United States (DHS) by origin reflect the number of cases.

## Notes

(1) UNHCR estimate.

(2) Serbia (and Kosovo: S/RES/1244 (1999)).

(3) The former Yugoslav Republic of Macedonia.

(4) The figure includes asylum-seekers registered with UNHCR as well as asylum-seekers who have been pre-registered but who are pending official registration with UNHCR. As of early September 2014, there were some 832,000 registered Syrian refugees in Turkey covered by the Government's Temporary Protection Regime. The number of Syrian asylum-seekers included in this table covers only those who for specific reasons have been referred to UNHCR for further evaluation of their international protection needs.

(5) Combination of number of persons (EOIR) and cases (DHS).

TABLE 11

## Applications submitted by country of asylum and origin

| Second quarter 2014

## Notes

(1) UNHCR estimate.

(2) Serbia (and Kosovo: S/RES/1244 (1999)).

(3) The former Yugoslav Republic of Macedonia.

(4) The figure includes asylum-seekers registered with UNHCR as well as asylum-seekers who have been pre-registered but who are pending official registration with UNHCR. As of early September 2014, there were some 832,000 registered Syrian refugees in Turkey covered by the Government's Temporary Protection Regime. The number of Syrian asylum-seekers included in this table covers only those who for specific reasons have been referred to UNHCR for further evaluation of their international protection needs.

(5) Combination of number of persons (EOIR) and cases (DHS).

**TABLE 12 Top-10 nationalities of asylum applicants by country of asylum | Second quarter 2014**

**TABLE 14 Monthly asylum applications lodged in 44 industrialized countries by origin | 2014**

Top-40 ranking based on applications lodged during the first six months of 2014.

Totals between this Table and Table 1 and 13 differ because figures for the United States (DHS) by origin reflect the number of cases.

Origin	2014						Total
	Jan.	Feb.	Mar.	Apr.	May	Jun.	
Syrian Arab Rep.	7,489	7,040	7,361	7,390	8,627	10,469	48,376

**Cover photo:** Asylum-seekers and  
economic migrants take to the seas,  
waiting out the dangerous journey in  
the boat's cramped cargo space. The  
passengers include people who fled  
conflict zones back home and who are  
in need of international protection.
