

Amplio Ventures is honored to represent the private sector in this dialogue today. Thank you distinguished moderator and chair.

We are raising \$100M dollars to invest in refugee job placement and creation. Our first fund is focused on remote refugee employment and seeks to provide remote jobs refugees and IDPs can do from any location with an internet connection. We are seeking state partners interested in providing digital employment solutions in their country, recognizing that job creation eases xenophobic tension and creates new revenue streams for host countries. Thank you for allowing the private sector to partner with you in restoring refugee stability.
