BIDDER QUERIES AND ANSWERS

UNHCR TENDER # PAKIS /RFQ/280

ESTABLISHING OF THREE (2+1) YEARS FRAME AGREEMENT FOR PROVSISION OF VEHICLE TRACKING SYSTEM FOR UNHCR VEHICLE IN PAKISTAN

Please find the answers to queries raised by the vendor in blue.

- if there is any pre-bid session that we could attend.
  (No pre-bid session will be held)

- Are both GPS and sim-based tracking required, or can we recommend one based on accuracy?
  (Yes, GSM and GPS tracking both are required)

- Idle time configured is at 5mins. Any change needs to be communicated.
  (We will let you know if any change is required)

- The SOS button mentioned is required as hardware installed in the vehicle or in-app button is required?
  (Hardware button required).

- System alteration scenarios need to be confirmed.
  (Cable or power disconnection and Jammer detection)

- Is the list of drivers assigned to vehicles static? If not, is driver identification device also required?
  (It's a part of optional features, and we prefer to have a separate device to record the identity of driver)

- Vehicle utilization details need to be confirmed. Is it required on mileage or any other parameter as well?
  (It's a part of optional feature, and we prefer that it should be based on day-wise vehicle movement providing details of the mileage covered in each day)

END
