

Description
<p>Type A maintenance – every 10 000 km:</p> <ul style="list-style-type: none"> - check the level of oil, coolant, windshield wiper fluid - diagnostics of the general condition of the car: electricity, steering system, brake system, air conditioning system - oil change in the combustion engine - diagnostics of a running gear - greasing of a cardan shaft - replacement of the oil filter - replacement of cabin filter - replacement of the air filter - replacement of the fuel filter - wheel alignment
<p>Type B maintenance – every 30 000 km:</p> <ul style="list-style-type: none"> - check the level of oil, coolant, brake fluid, windshield wiper fluid - diagnostics of the general condition of the car: electricity, steering system, brake system, air conditioning system - check of oil level in a transmission (to top up if necessary) - oil change in the combustion engine - diagnostics of a running gear - greasing of a cardan shaft - replacement of the oil filter - replacement of the cabin filter - replacement of the air filter - replacement of the fuel filter - wheel alignment
<p>Type C maintenance – every 60 000 km:</p> <ul style="list-style-type: none"> - check the level of oil, coolant, brake fluid, windshield wiper fluid - diagnostics of the general condition of the car: electricity, steering system, brake system, air conditioning system - check of oil level in a transmission (to top up if necessary) - oil change in the combustion engine - diagnostics of a running gear - greasing of a cardan shaft - replacement of the oil filter - replacement of the cabin filter - replacement of the air filter - replacement of the fuel filter - wheel alignment - oil change in the junction box - oil change in axles (front and rear) - replacement of brake fluid
<p>Type D maintenance – every 90 000 km:</p> <ul style="list-style-type: none"> - check the level of oil, coolant, brake fluid, windshield wiper fluid - diagnostics of the general condition of the car: electricity, steering system, brake system, air conditioning system

- check of a drive belt of hinged units and a set of rollers
- oil change in the combustion engine
- diagnostics of a running gear
- greasing of a cardan shaft
- replacement of the cabin filter
- replacement of the oil filter
- replacement of the air filter
- replacement of the fuel filter
- wheel alignment
- oil change in the junction box
- oil change in axles (front and rear)
- replacement of radiator coolant
- replacement of brake fluid
- change of oil in a transmission
