Climate change is increasingly driving displacement and protection needs around the world. As one of the key actions to reduce its carbon footprint, UNHCR is incorporating sustainability considerations into all areas of the end-to-end supply chain and continues to work with like-minded partners to do so.

This event will present the achievements to date and provide an update on the efforts made by UNHCR to reduce its carbon footprint by 20 per cent by 2025. New initiatives will also be discussed, including innovative collaboration with partners, that will ensure lasting impact and support for people forced to flee, the host communities and the planet.

Wednesday, 13 September 2023

13:30-14:45

[Hotel Mercure Geneva Airport](#)

Room Mercure-Saturne-Jupiter

Refreshments will be served outside of the room prior to the event.

Interpretation in English and in French will be available.
