Harvey, P. A. (2007)
Excreta Disposal in Emergencies: A field manual
WEDC, Loughborough University, UK.

ISBN 978 1 84380 113 9

Acknowledgements

Project Steering Committee

Andy Bastable, Oxfam GB
Mark Henderson, UNICEF
Uli Jaspers, IFRC
Dinesh Shrestha, UNHCR

Designed and produced at WEDC by

Glenda McMahon and Rod Shaw

Illustrations

Ken Chatterton and Rod Shaw

The production of this manual was funded, supported and facilitated by the following organizations:

International Federation
of Red Cross and Red Crescent Societies

Oxfam unicef

Thanks are extended to the following individuals for contributing case study examples, photographs, additional information and review comments:

George Barreras, Frank Broadhurst, Stuart Cheesman, Sally Crook, St. John Day, Bill Fellows, Jean-Francois Fesselet, Jorge Figueroa, Robert Fraser, Mariona Miret Gaspa, Steve Harries, Ben Harvey, Dave Hockaday, Hazel Jones, Rajesh Kumar Pasupuleti, Bibi Lamond, Shamma Lal, Annie Lloyd, Richard Luff, Patrick Kilchenman, Jese Wainaina Kinyanjui, Ali Marvasti, Victoria Murtagh, Jamila Nawaz, Joos van den Noortgate, Alban Nouvellon, Marion O'Reilly, Edoardo Piano, Jean-François Pinera, Manuel Quingani, Saira Raza, Bob Reed, Prasad Sevekari, Ann Smith, Zacarias Tchitumba, Alois Jost Widmer.

We also extend our thanks to the many agency staff who have also contributed to this manual.

Contents	vii
List of boxes	xiii
List of figures.....	xiv
List of photographs	xvi
List of tables	xvii
1. Introduction	1
1.1 About this manual	1
1.2 Excreta disposal, health and survival	2
1.3 Phases of an emergency	4
1st Phase acute emergency	4
2nd Phase stabilized emergency	4
1.4 Programme process	5
2. Assessment	9
2.1 Assessment principles	9
Health and hygiene issues.....	12
Socio-cultural issues	14
Environmental and technical issues	15
2.2 Assessment tools and techniques	16
Observation	16
Measurement and testing	17
Surveys.....	17
Interviews.....	17
Participatory techniques.....	18

2.3	Follow-up assessment and consultation	21
3.	Programme Design	23
3.1	Outline programme design.....	23
	Setting objectives.....	24
	Setting priorities	24
	Action plan	26
3.2	Detailed programme design	27
	Logical framework.....	27
3.3	Planning for the needs of people.....	31
	Dignity	31
	Family or communal facilities.....	32
	Gender considerations.....	35
	Disability considerations	36
	Considering HIV/AIDS.....	38
	Children's and infants' excreta.....	39
3.4	Selecting appropriate technologies.....	42
3.5	Implementation	45
	Programme management.....	46
	Managing implementation	47
	Contingency planning.....	48
	Co-ordination.....	49
4.	1st Phase Technical Options	51
4.1	Immediate action.....	51
4.2	Managing open defecation.....	52
	Location of defecation fields	54
	Operation of defecation fields	54

4.3	Shallow trench latrines	56
4.4	Deep trench latrines.....	58
4.5	Shallow family latrines.....	60
4.6	Bucket latrines	62
4.7	Packet latrines.....	62
4.8	Chemical toilets	63
5.	2nd Phase Technical Options	67
5.1	Simple pit latrines	68
5.2	Ventilated-improved pit (VIP) latrines	70
	Vent pipe details.....	72
5.3	Eco-San	73
	Double-vault urine-diverting latrine	74
	Double-vault non-urine-diverting latrine.....	76
	Biogas latrines.....	77
5.4	Borehole latrines.....	78
5.5	Pour-flush latrines.....	80
5.6	Septic-tanks	82
5.7	Communal aqua-privies.....	84
5.8	Wastewater treatment systems	86
	Collection and transport.....	86
	Treatment and disposal.....	87
	Commercial systems.....	87
5.9	Excreta disposal for institutions	88
	School latrines.....	90

6.	Strategies for Difficult Situations	93
6.1	High water-tables	94
	Raised pit latrines	95
	Sand-enveloped pit latrines	98
	Eco-San and twin-pit latrines	98
	Sealed pits/tanks	101
	Septic-tanks and aqua-privies	101
6.2	Flooding.....	104
	Flood-response strategy	105
	1st phase options for rapid-onset floods	105
	2nd phase options	109
6.3	Rocky areas.....	112
6.4	Urban environments	112
	Sewerage systems	113
6.5	Where toilets are not wanted.....	116
7.	Technical Design Information.....	117
7.1	Siting latrines	118
7.2	Use of local materials and designs	119
7.3	Pit excavation and lining	125
	Sizing pits	131
7.4	Latrine slabs.....	133
	Concrete mixes	137
	Squat-hole covers	139
7.5	Pour-flush toilet pans.....	141
7.6	Superstructure design	144
	Lightweight (portable) superstructures.....	146

	Superstructures using local materials	146
	Prefabricated-superstructure units.....	148
7.7	Septic-tank design	154
	Septic-tank construction	156
	Soakfield design.....	157
8.	Operation and Maintenance	161
8.1	Public health promotion	161
8.2	Cleaning and maintenance.....	163
8.3	Handwashing	164
8.4	Anal-cleansing material	170
8.5	Fly reduction	172
8.6	Sludge reduction.....	173
8.7	Latrine desludging	174
	Mechanical emptying	174
	Manual emptying.....	176
	Sludge disposal.....	178
8.8	Decommissioning facilities	179
9.	Monitoring.....	181
9.1	The need for monitoring	181
9.2	Objectives and indicators.....	182
9.3	Monitoring methods.....	185
	Monitoring framework	188
	Monitoring review	188
9.4	Monitoring reports	190

Appendix 1. Measuring Soil Infiltration Rates	193
Appendix 2. WATSAN HIV/AIDS Checklist.....	195
Appendix 3. Excreta Disposal Guidelines	197
Appendix 4. Bills of Quantities	201
Appendix 5. Latrine Monitoring Forms	223
References and Bibliography.....	229

List of boxes

Box 2.1.	The importance of consulting communities	10
Box 2.2.	The importance of incorporating baseline information on hygiene behaviour in Eritrea	14
Box 3.1.	Privacy and security for women.....	37
Box 3.2.	Excreta disposal solutions for infants and children	41
Box 4.1.	Preventing indiscriminate open defecation	52
Box 4.2.	Chemical toilets deployed in flood response in the Dominican Republic.....	64
Box 5.2.	Providing school latrines in East Timor	91
Box 6.1.	Twin-pit composting latrines in Nepal.....	100
Box 6.2.	Elevated compost latrine construction in El Salvador	103
Box 6.3.	Dismountable latrines in flooded areas of Eastern Bolivia.....	108
Box 6.4.	Elevated compost latrines in Dominican Republic.....	110
Box 6.5.	Flooding as an impetus for latrine use in Nepal.....	111
Box 7.1.	Using local designs for latrine structure in Angola	122
Box 7.2.	Sandbag pit-lining in Kenya and Sudan	130
Box 7.3.	Pit-lining with local materials in Mozambique	131
Box 7.4.	Screened hygiene units in Pakistan	149
Box 7.5.	Designing for disabled people in Pakistan	152
Box 7.6.	Bathing and latrine facilities after the Bam earthquake in Iran	153
Box 8.1.	Anal-cleansing in Afghanistan.....	171
Box 8.2.	Desludging after a flood in Mozambique.....	177
Box 9.1	Latrine-coverage monitoring in Eastern Chad	187

List of figures

Figure 1.1.	Faecal-oral transmission routes.....	3
Figure 1.2.	Programme process for emergencies	7
Figure 3.1.	Technology selection process for excreta disposal.....	44
Figure 4.1.	Shallow trench latrines	57
Figure 4.2.	Deep trench latrines	59
Figure 4.3.	Shallow family latrines.....	61
Figure 5.1.	Simple pit latrines.....	69
Figure 5.2.	VIP latrines.....	71
Figure 5.3.	Double-vault composting latrine	75
Figure 5.4.	Borehole latrine	79
Figure 5.5.	Pour-flush latrines.....	81
Figure 5.6.	Septic-tank	83
Figure 5.7.	Communal aqua-privy.....	85
Figure 5.8.	Institutional latrine design	92
Figure 6.1.	Raised bamboo lined latrine	96
Figure 6.2.	Raised block latrine.....	97
Figure 6.3.	Sand-enveloped latrine	99
Figure 6.4.	Roding eyes - double	114
Figure 6.5.	Roding eyes - single.....	114
Figure 6.6.	Rocker pipes	115
Figure 6.7.	45 Degree pipe bends.....	115
Figure 7.1.	Traditional latrine using local materials.....	123
Figure 7.2.	Timber support systems for deep trench latrines.....	127
Figure 7.3.	Brick lined pit.....	128

Figure 7.4.	Pre-cast concrete ring pit liner	129
Figure 7.5.	Reinforced concrete latrine slab	136
Figure 7.6.	Domed concrete slab (without reinforcement)	138
Figure 7.7.	Squat-hole covers	139
Figure 7.8.	Wooden slab for twin compartment latrine	140
Figure 7.9.	Ferrocement slab with pour-flush bowls (for use on 800mm ø pre-fab concrete ring)	143
Figure 7.10.	Timber frame for trench latrine superstructure	145
Figure 7.11.	PVC-pipe superstructure frame	146
Figure 7.12.	Superstructure for family VIP latrine with spiral entrance	147
Figure 7.13.	Low-cost latrine superstructure.....	148
Figure 7.14.	Women's latrine/washroom screened units for camps.....	151
Figure 7.15.	Basic tank dimensions	156
Figure 7.16.	Septic-tank design	158
Figure 7.17.	Soakfield trench	159
Figure 7.18.	Septic-tank location plan.....	160
Figure 8.1.	Traditional handwashing devices.....	167
Figure 8.2.	Traditional handwashing devices.....	168
Figure 8.3.	Improved handwashing devices	169

List of photographs

Photograph 5.1. Solar urine-diverting latrine in El Salvador	77
Photograph 6.1. Floating latrine in Indonesia	107
Photograph 7.1 Plastic pour-flush latrine slab.....	141
Photograph 7.2. Cement pour-flush pan.....	142
Photograph 7.3. Plastic pour-flush pan and lid	142
Photograph 8.1. The ‘Captap’ in use in Liberia.....	166

List of tables

Table 2.1.	Indicative acceptable incidence rates in camps for displaced persons or refugees (after de Veer, 1998)	13
Table 3.1.	Example activity plan	26
Table 3.2.	Example logical framework	28
Table 3.3.	Advantages and disadvantages of communal and family latrines	34
Table 3.5.	Implementation by milestones	48
Table 5.1.	Minimum toilet provision for schools	90
Table 7.1.	Minimum separation distances for latrines/septic-tanks and groundwater sources.....	119
Table 7.2.	Advantages and disadvantages of traditional latrines ..	124
Table 7.3.	Lining requirements for different soil types	125
Table 7.4.	Suggested maximum sludge accumulation rates.....	133
Table 7.5.	Comparison of latrine slabs.....	134
Table 7.6.	Spacing for steel reinforcing bars in pit-latrine slabs	135
Table 7.7.	Recommended septic-tank retention times	154
Table 7.8.	Sludge-digestion factors 'F'	155
Table 7.9.	Suggested infiltration rates	159
Table 9.1.	Logframe example	183
Table 9.2.	Monitoring framework.....	189
Table 9.3.	Situation report outline	191

Table A2.1.	Key questions	195
Table A4.1.	BoQ: Deep trench latrine (4-unit block).....	202
Table A4.2.	BoQ: Simple pit latrine (with different superstructure ... options)	202
Table A4.3.	BoQ: Concrete-block-lined single pit.....	207
Table A4.4	BoQ: VIP Latrine.....	209
Table A4.5.	BoQ: Pour-flush latrine and septic-tank.....	211
Table A4.6.	BoQ: Double-vault, urine-diverting latrine	213
Table A4.7.	BoQ: Double-unit pit latrine	215
Table A4.8.	BoQ: Women's hygiene unit.....	217
Table A4.9.	BoQ: Reinforced-concrete septic-tank	219
Table A4.10.	BoQ: Sewerage network and infiltration system for five houses.....	221
