

Overview

Operational highlights

- UNHCR's response to the Mali situation evolved throughout the year, shifting from emergency response to a more regular operation, as the number of arrivals decreased from 1,500 per day at the beginning of 2013 to one per day by the year's end.
- The organization delivered assistance to some 66,400 Malian refugees in Mbera refugee camp, including more than 31,000 newly registered arrivals.
- From June onwards, UNHCR observed the spontaneous repatriation of some 2,000 Malian refugees from

Mauritania, the majority of whom (97 per cent) were Tuareg refugees returning to the Timbuktu region. To facilitate their return, UNHCR issued travel documents and registered them in Mali, in collaboration with the Malian authorities.

• The Government of Mauritania and UNHCR co-led the coordination of humanitarian response to the Mali refugee situation, continuing to support land allocation for Mbera camp and providing security for refugees and humanitarian workers in Bassikounou, Fassala and Mbera.

 UNHCR registered 375 refugees and 845 asylum-seekers, mostly from sub-Saharan African countries, who were living in urban areas of Nouakchott and Nouadhibou, and the authorities granted them access to health services.

People of concern

Mauritania hosts some 66,400 Malian refugees who have fled insecurity in northern Mali since 2012. Other people of concern to UNHCR included urban refugees and asylum-seekers, mostly Ivorian and Congolese, as

well as Mauritanian returnees from Mali. In addition, 26,000 Sahrawi people continued to be considered in a refugee-like situation, but did not approach UNHCR for assistance as they are well integrated in Mauritania.

Achievements and impact

The following matrix contains examples of objectives and targets set for UNHCR's programme interventions in this operation in 2013. Short commentaries on the

end-year results and impact on people of concern are provided, including indications of why targets may not have been met.

Planned activities	People of concern (PoC)	2013 comprehensive target	2013 end of year results			
FAVOURABLE PROTECTION ENVIRONMENT						
Law and policy developed or strengthened	Law and policy developed or strengthened					
Result/impact: UNHCR continued to advocate for the adoption of a national asylum system and provided support to the authorities for its establishment.						
Gap: Due to the postponement of the legislative elections, the draft la	w on asylum was not subr	mitted to the Parliament fo	or adoption.			
Number of events, workshops and seminars organized	Urban refugees and asylum-seekers	7	6			
Extent law and policy consistent with international standards	Urban refugees and asylum-seekers	100%	72%			
FAIR PROTECTION PROCESSES AND DOCUMENTATION						
Quality of registration and profiling improved or maintained						
Result/impact: UNHCR continuously updated its database to produce detailed and accurate statistics of the Malian refugee population in Mbera camp. Together with Mauritania's authorities, UNHCR launched a joint biometric registration exercise and an enhanced verification process, allowing the identification of cases of fraud, double registrations and deactivation of absentees.						
Number of PoC registered on an individual basis with minimum set of data required	Malian refugees	70,000	66,392			
Civil registration and civil status documentation strengthened						
Result/impact: Pending the adoption of a national asylum law, UNHCR advocated for the delivery of national identity and civil status documentation to refugees, particularly birth certificates for refugee children born in Mauritania.						
Gap: Despite UNHCR advocacy, no refugee children born in Mauritania have been issued birth certificates.						
% children under 12 months old who have been issued birth certificates by the authorities	Urban refugees and asylum-seekers	20%	0

ICRC, IOM, OCHA, OHCHR, UNDP, UNFPA, UNICEF, UNV, WFP. WHO

Assessment of results

In response to the Malian refugee influx, UNHCR expanded its delivery of protection and assistance to those refugees living in Mbera camp. The camp was equipped with basic infrastructure, including over 2,400 communal latrines; 2,100 communal showers; 12 nutritional rehabilitation centres; six health facilities (including a maternity ward); six schools; six child-friendly spaces; five distribution centres; five boreholes for water; four community centres; one psychosocial centre; one nursery; and one registration centre. UNHCR and the Mauritania authorities improved population data management through the launching of a joint biometric registration exercise and an enhanced verification process.

UNHCR and partners made great improvements in key sectors, and in some areas were able to fully achieve international standards. Notably, the establishment of a food distribution system in 2012, coupled with different nutritional programmes, meant more households could meet their basic food needs; the rate of severe food insecurity dropped from 13.6 per cent in March 2013 to 2.3 per cent in October the same year. The rate of global acute malnutrition was reduced from 13.2 per cent in January to 11.8 per cent in October, although this remained above the target reduction to 10 per cent. The rate of severe acute malnutrition dropped below the emergency threshold of 2 per cent (from 3.2 per cent in January to 1.4 per cent in October.) Digging five boreholes enabled the organization to provide potable water above the minimum standard of 20 litres per person, per day.

UNHCR improved its protection response by establishing functional coordination mechanisms and adopting a protection strategy and work plan to better identify protection risks and enable equal access to services for vulnerable people. UNHCR also ensured that Malian refugees were able to participate in the election process in Mali. Finally, the organization launched livelihoods projects, such as farming, sewing and craft activities, for more than 2,300 refugees in Mbera camp.

To better assist urban refugees and asylum-seekers, UNHCR strengthened its refugee status determination (RSD) activities; it took on 165 individual cases, prioritizing people with specific needs. A verification and biometric registration exercise, conducted for asylum-seekers and urban refugees in Nouakchott and Nouadhibou, enabled UNHCR to produce more reliable population figures. In June 2013, the Office resumed the working sessions with the National Consultative Commission for Refugees. This enabled the reactivation of national mechanisms for RSD, resulting in the approval of 44 out of the 61 refugees recognized under UNHCR's mandate. The Office also strengthened self-reliance projects and vocational training, implementing 72 income-generating projects. Durable solutions were found for nine urban refugees who were resettled to third countries, and for five who returned voluntarily to their countries of origin.

Working with others

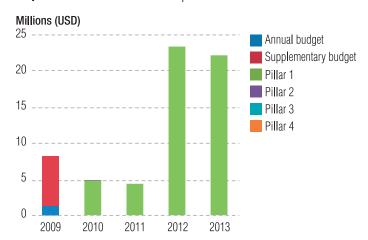

UNHCR worked closely with the Ministry of the Interior and Decentralization and participated in the UN Country Team and Humanitarian Country Team. At the request of the Mauritanian Government, UNHCR coordinated the response to the Malian refugee situation, in close collaboration with its national counterpart and a range of implementing partners. UNHCR organized regular coordination meetings in Nouakchott and Bassikounou with the authorities, UN agencies, international NGOs and national civil society partners.

Financial information |

In 2013, the revised financial requirements for UNHCR's operation in Mauritania amounted to USD 30.2 million, up from the initial ExCom-approved amount of USD 28 million. Expenditures amounted to some USD 22.2 million, mostly for providing protection and assistance for Malian refugees.
