

Thank you Honorable Co Chair and Panel Members.

I do like to draw attention on Climate Displacement issue, which should get due important in the discourse of Global Compact on Refugees, to facilitate sustainable a solution.

This is the problem, root cause lying in Global level especially in developed countries but impact is being happening in global south, especially island and delta countries. Whom has little contribution in carbon emission and who are in fact innocent victim.

It should be noted that, as scientist forecast, it is 1 in each 15 people in global level and 1 in each 5 people in Bangladesh will be the climate displaced. There are possibility of extinctions of some of the island nations.

This is the violation of human rights, like human rights violation to Refugees, these people has the right to live and right to life.

These climate displaced has no international legal regime, may I urge to include a plea for a legal regime in Global Compact on Refugee like 1951 convention for this climate displaced people.

That's all, thank you Mr Chair.

Rezaul Karim Chowdhury, COAST Trust and APRRN, 14th Nov 2017
